OILFIELD AND PETROCHEMICAL SYSTEMS

X-CIDE® 320 Industrial Bactericide may be used either in slug treatments or in continuous application. Dosages may vary from 500 ppm of X-CIDE® 320 Industrial Bactericide in slug application to 30-50 ppm of X-CIDE® 320 Industrial Bactericide in continuous treatment (1/4 pint per 1000 gallons equals approximately 30 ppm). A typical slug treatment is to add 125 ppm of X-CIDE® 320 Industrial Bactericide (1 pints per 1000 gallons of water) at intervals as needed to prevent growth of bacterial slime.

Badly fouled systems may be slug treated to establish control, followed by continuous treatment of 30-60 ppm (1/4 to 1/2 pints per 1000 gallons of water) to maintain control.
