TECH-SPRAY is useful in meat packing and food processing plants, mills, elevators, granaries, warehouses and food storages. It should only be applied in aerosol spray in the edible products area of federally inspected meat, poultry or egg packing plants.

TECH-SPRAY. Use a good machine which delivers a fine mist against the listed flying insects, direct the spray upwards, filling the room with a mist. If possible, keep doors and windows closed for ten minutes after spraying. Do not remain in treated area. Ventilate area when treatment is complete. For control of the listed running and crawling insects, direct mist into all places commonly infested by them, such as cracks, wall openings or crevices.

SURFACE SPRAY: Spray a good surface part of the day, and repeat, if necessary, after 24 hours. If the spray is not effective, it should be repeated when necessary.
