INDOOR FOGGER INSECTICIDE SPRAY

The contents of this container will treat an unobstructed area of approximately 5,000 cubic feet. This is based on applying at least one ounce of contents per 1,000 cubic feet. If area is larger, use additional containers. The fine aerosol particles fill exposed and accessible stages of cockroaches, ants, flies, silverfish, crickets, mosquitoes, gnats, wasps, bees and small flying moths.

DIRECTIONS FOR USE - AS A TOTAL RELEASE PRESSURIZED SPRAY AND INDOOR FOGGER.
GENERAL DIRECTIONS: Cover exposed foods, dishes, messes and food handling equipment and surfaces. Open cabinets and doors to expose areas to be treated. Turn off fans and air conditioning and put out all flames and pilot lights. Close all doors and windows. Point valve opening away from face and eyes when releasing. Use one can for each 5,000 cubic feet of unobstructed area. Use additional units for remote rooms or where a free flow of mist is not assured. Do not remain in the area during treatment leaving room or building at once and keep the area treated closed for four hours before entering and moving out. After this treatment, open doors and windows and allow to air out for 30 minutes. Repeat spraying in two weeks if necessary. Remove pets, birds and fish aquariums before spraying.

NO REPEAT NEEDED AS A TOTAL RELEASE SPRAY. To lock valve for total activity, hold container upright away from you and point valve opening away from face and eyes. Press valve button all the way down until it hooks into and catches on bottom of can. Then place fogger on stand or table in center of room with valve locked open, placing several layers of newspaper under can. Follow directions on above paragraph.

AS A PRECAUTIONARY SPRAY FOR SPOT TREATMENT: This product can be used for spot spraying. Do not lock top. Spray in short bursts, pointing spray upwards with a circular motion for 5-10 seconds for an average room. Keep room closed for 15-20 minutes. Then air room out for 15 minutes. Spray directly on roaches, flies, waterbugs, silverfish and ants wherever possible.

Do not use as a one shot type treatment after using manually. It would be impossible to determine the area it would adequately treat as a one shot type treatment. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Avoid breathing dust or mist through nose. Avoid contact with eyes. Avoid contact with skin. Avoid contact with clothing. Wash hands thoroughly after use. Do not use in areas where children or pets are present. Avoid contact with food and food preparation surfaces.
