DIRECTIONS FOR USE

For flies, houseflies, mosquitoes, moths, gnats, fleas, roaches, silverfish, ants, bedbugs, spiders, centipedes, and acridids. For all types of flying insects (the Angoumois Grain Moth, Indian Flour Moth, Indian Meal Moth), especially flying forms of stored product pests (Wheat Weevils, and also crawling Carpet Beetles, Drug Store Beetles and Rat Weevils); close all doors and windows, turn up the yard and direct the aerosol mist to all parts of the area to be treated. Fog particularly in areas in which these insects are most likely to congregate. Fog at the rate of 3 seconds per 1000 cubic feet of space. Best results are obtained when sprayed directly on crawling insects.

Keep the treated area closed for 15 minutes. Do not remain in treated area and ventilate the area after treatment is completed. Do not spray closer than 36 inches to fabrics or upholstery. Spraying closer than directed or excessive treatment may cause damage.

CAUTION: Do not apply directly to food. Cover or remove all food and food processing equipment during application. Use this product in food processing plants only when plants are not in operation. All food processing surfaces should be covered or thoroughly washed with potable water before using. Remove birds and pets. Cover fish aquariums before spraying.

WARNING: Contents under pressure. Do not puncture container. Do not store at temperatures exceeding 130°F. Do not use or store near heat or open flame. Do not incinerate or spray into open flame.

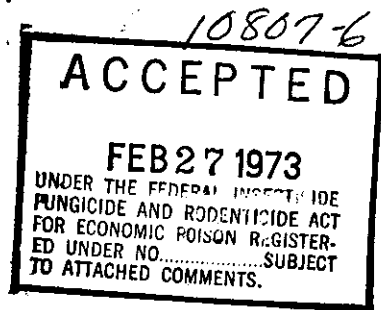

ACTIVE INGREDIENTS:

Pyrethrins	30%
Piperonyl Butoxide, technical	60%
N-octyl bicycloheptene dicarboximide	1.00%
Petroleum distillate	12.80%
INERT INGREDIENTS:	85.30%

*Equivalent to 0.10% (butyric acid) (S-propyl piperonyl) ether and 9.12% related compounds.
