tional cautions on back panel)

Net Weight 1 lb 2 ounces

### Flying Insect Killer

#### Directions

Remove protective cap. Holding dispenser upright, point valve in desired direction and press dispenser button to spray.

**Mosquitoes, Flies, Gnats:** Close all doors and windows. Direct the spray to all parts of the room. Fill the room with mist, then leave the treated area. Keep room closed for at least 15-30 minutes. Ventilate the room when treatment is completed.

**Wasps:** Application should be made in late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many insects as possible. Repeat as necessary.

**For crawling insects:** Roaches, earwigs, grain mites, sowbugs, spiders and centipedes: Spray thoroughly into hiding places such as cracks, crevices, moist areas, openings around pipes and sinks, under refrigerators, baseboards, and storage areas. Spray directly on insect where possible.

**Ants:** Spray trails, nests and points of entry. Spray on ants where possible. Repeat as necessary.

**CAUTION:** Use as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using. In hospitals, patients should be removed from room prior to treatment. Room should be ventilated for 2 hours after spraying. Do not return patients to room until after ventilation. Avoid contamination of food and feedstuff. Cover or remove fishbowls. Remove all pets from area to be treated.
