DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DISPOSAL: Do not reuse empty container. Wrap container and put in trash collection.

FOR USE IN AUTOMATIC DISPENSERS: One dispensing unit should be installed for each 6,000 cubic feet of space to be treated. The dispenser activates the 34 mg. active once every 15 minutes. After 48 hours of operation, enough insecticide is suspended in the air to kill a substantial proportion of the flies, mosquitoes and gnats present. Usually the effectiveness will be noticeable within one hour after the dispenser is activated. If less than 24-hour control is required, the dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperatures all affect insect activity and control. Therefore, one unit per 6,000 cubic feet should be considered as an average need with adjustments made depending on specific conditions at place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed.

This 6.5 oz. can of insect killer contains approximately 3,400 sprays sufficient to sustain operation for a total of 350 hours, 25 days on around-the-clock basis or 70 days on a 12-hour basis. When used on a 24-hour basis, it is suggested that the container be changed once a month (once every 2 months on a 12-hour basis).

ACTIVE INGREDIENTS:

Pyrethrins	0.923%
Piperonyl Butoxide Technical*	1.845%
N-octyl Bicycloheptene dicarboximide	3.075%
Petroleum Hydrocarbons	43.887%
INERT INGREDIENTS	50.490%

*Equivalent to 1.478% (butylcarbitol)(6-propylpiperonyl) ether and 389% related compounds.
This product contains petroleum distillates.

EPA Reg. No. 10807-44 EPA Est. No. 10807 GA-1

NET WT. 6.5 OZ.

AUTOMATIC DISPENSER: Concentrated Aerosol Insect Killer contains a highly effective insecticide formulation specifically designed for use in automatic dispensing units around food handling establishments, food processing establishments, restrooms, dining rooms, restaurants, supermarkets, food warehouses, bottling plants, hospitals, nursing homes, day care centers, hotels, motels, schools, offices, factories, ships, kennels, barns, and egg and milk handling areas of dairies and chicken houses where flies, gnats, living moths and mosquitoes are an annoyance.

HAZARDS TO HUMANS and DOMESTIC ANIMALS
Do not use in public areas while customers are present. Do not use where people will be continuously exposed. Inform employees of the nature and purpose of material being automatically dispersed.

The active ingredients of this product are toxic to fish. Automatic dispensers should not be installed near fish tanks. Users may want to remove fish from treated rooms.

PHYSICAL OR CHEMICAL HAZARDS: Contents under pressure. Do not puncture. Do not use or store near open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.

CAUTION: Do not use in nurseries or rooms where infants, ill or aged persons are confined. Do not install directly on or within 12 feet of any food handling or dispensing area. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations.

Facilities and equipment in federally inspected meat and poultry plants must be washed with an effective cleaning compound followed by a potable water rinse after spraying.
