Amrep, Inc.
990 Industrial Park Drive
Marietta, GA 30062

Attention: Toney M. Jackson

Gentlemen:

Subject: Misty Fog-It
EPA Registration No. 10807-76
Your Letter Dated August 1, 1987

The proposed amendment to the registration of the product cited above, changing the declaration of petroleum distillate from active to inert and bringing the label into compliance with PR Notices 87-6 and 87-8, is acceptable subject to the comments listed below. A stamped copy of the draft label is enclosed for your records. Submit five (5) copies of the finished printed label before the product is released for shipment under the revised label.

1. Since PR Notice 87-8 has been withdrawn, you may wish to revert back to the physical and chemical hazard statements used prior to PR Notice 87-8.
2. Submit a corrected updated Confidential Statement of Formula (CSF). Refer to the guide for completing the CSF enclosed with our letter for EPA Registration No. 10807-140. For the active ingredients the percentage declared on the label cannot be higher than the lower certified limit. Note that the lower certified limits on the current CSF do not conform with the label declaration.
