DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DISPOSAL: Do not reuse empty container. Wrap container and put in trash collection.

FOR USE IN AUTOMATIC DISPENSERS: One dispensing unit should be installed for each 8,000 cubic feet of space to be treated. The dispenser activates the 54 mg. valve once every 15 minutes; after two hours of operation enough insecticide is suspended in the air to kill a substantial proportion of the flies, mosquitoes and gnats present. Usually the effectiveness will be noticeable within one hour after the dispenser is activated. If less than 24 hour control is required, the dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperature affect insect activity and control. Therefore, one unit per 8,000 cubic feet should be considered as an average need within adjustments made depending on specific conditions of place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect prevention practices are followed.

This 8 1/2 oz. can of insect killer contains approximately 3,400 "shots" sufficient to sustain operation for a total of 850 hours (35 days on around-the-clock) or 70 days on a 12-hour basis. When used on a 24-hour basis, it is suggested that the container be changed once a month (once every 2 months on a 12-hour basis).

AUTOMATIC DISPENSER: Concentrated Aerosol Insect Killer contains a highly effective insecticide formulation specifically designed for use in automatic dispensing units around food handling establishments, food processing establishments, rest rooms, dining rooms and restaurants where flies, gnats, flying moths and mosquitoes are an annoyance.

PHYSICAL AND CHEMICAL HAZARDS: Contents under pressure. Do not puncture. Do not use or store near open flame. Exposure to temperatures above 120°F may cause bursting. Never throw container into fire or incinerator.

CAUTION: Do not use in nurseries or rooms where infants, ill or aged persons are confined. Do not install directly over or within 12 ft. of any food handling or dispensing area. Large drafts of forced ventilation may reduce or eliminate the insecticidal efficacy of these installations.

EPA Reg. No. 10807-81

EPA Est. No. 10807-GA-1

Manufactured By

AMREP, INC. • 990 Industrial Park Dr. • Marietta, GA 30062

Misty Mizer ECONOMY INSECTICIDE II

Keep out of reach of children.

CAUTION

See side panel for additional cautions.

NET WT. 8 1/2 OZ.

ACTIVE INGREDIENTS:

Pyrethrins 97%

Piperonyl Butoxide Technical 1.5%

N-octyl Bicycloheptene dicarboximide 3.0%

Permethrin Hydrocarbons 43.0%

INERT INGREDIENTS 50.0%

(Equivalent to 1.47% (butylcarbyl) (p-propylphenyl) ether and 2.00% related to "pounds
