

WISKEY

p.c.o. professional flying insect killer

FOR APPLICATION BY TRAINED PERSONNEL ONLY
For use in Household and Food Processing Plants, Restaurants, Industrial Buildings, (Schools, Warehouses, Offices, Theaters, Garages, Hotels, Motels, & Hospitals), and Animal Housing Areas including Kennels.

ACTIVE INGREDIENTS:

Pyrethrins	3.00%
*Piperonyl butoxide, technical	6.00%
†N-Octyl bicycloheptene dicarboximide	10.00%
Petroleum distillate	81.00%
	100.00%

*Equivalent to 4.8% (butylcarbityl) (6-propylpiperonyl) ether and 1.2% related compounds.

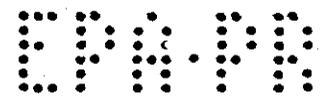

†MGK 264, Insecticide Synergist

**KEEP OUT OF REACH OF CHILDREN
CAUTION**
See side panel for additional precautionary statements.

ONLY FOR SALE TO, USE, AND STORAGE BY SERVICE PERSONS
EPA REG. NO. 10807-87 EPA EST. NO. 10807-GA-1/10807-TX-1
Manufactured By: AMREP, INC.
990 Industrial Park Drive • Marietta, GA 30062

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

CAUTION: Harmful if swallowed. Avoid breathing vapors or spray mist. Wear a pesticide respirator jointly approved by the Mining Enforcement and Safety Administration and the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11. Contains petroleum distillate. If swallowed, do not induce vomiting. Get immediate medical attention. Avoid contact with skin and eyes. In case of contact, immediately flush eyes and skin with plenty of water. Obtain medical attention if irritation persists. Do not apply directly to food. Do not apply space spray while food processing is underway. Cover or remove all food processing surfaces. Thoroughly wash all food processing surfaces before re-use. After spraying in meat packing plants, bakeries and the food processing plants, wash with potable water all equipment, benches, shelving, etc., where exposed food will be handled. When using in animal housing areas, do not apply directly to food, water or feed supplements. Do not apply directly to animals. Wash teats of dairy animals before milking. Remove pets, birds and cover fish aquariums before spraying. **Physical Hazards:** Do not store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE and DISPOSAL

Prohibitions: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. **Pesticide Disposal:** Pesticide spray mixture or rinse water that cannot be used according to label instructions must be disposed of according to applicable Federal State and local procedures. **Container Disposal:** Triple-rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in sanitary landfill, or by other approved State and local procedures. **General:** This concentrate is designed for use undiluted in mechanical sprayers such as the LECO Mini-ULV or Micro-Gen Micro Generator which gives particles of aerosol size. It can be diluted with refined kerosenes, which meet Food Additive Regulation 121.1182 and applied in fogging equipment such as the Microsol or Challenger machines that give larger than aerosol particle size. It can also be diluted with the oil specified above and applied as a contact spray to kill crawling insects shown later on this label. **Note:** When used in hospitals, patients should be removed prior to treatment. Ventilate for two hours after treatment. Do not return patients to room until after ventilation.

For use in Homes, Restaurants, Food Processing Plants and Other Industrial Areas:

Space Spray-Undiluted: To kill Houseflies, Mosquitoes, Gnats and Small Flying Moths: Close room and shut off all air conditioning or ventilating equipment. Using a cold fog generator, apply at the rate of 1/2 (.5 ounce per 1,000 cubic feet) of space. Direct output from aerosol generator upwards toward upper corners of room and ceiling. Leave room closed for one half hour. Ventilate room thoroughly before re-entry. Repeat as necessary.

Space Spray-Diluted for Ordinary Mechanical Fogging Equipment: To kill Flies, Mosquitoes, Small Flying Moths and Gnats: Cover or remove exposed food and food handling surfaces. Close room and shut off all air conditioning or ventilating equipment. Dilute concentrate with oil at the rate of 1 part concentrate plus 29 parts of oil and mix well. Apply at the rate of 50 fluid ounces of dilute spray (4 gallons) per 25,000 cubic feet of space. Direct fog upward towards upper corners of room and ceiling area. Leave room closed for 1/2 hour. Do not remain in treated areas. Ventilate room thoroughly before re-entry.

Contact Spray-Undiluted: To kill Cockroaches, Rice Weevils, Sawtoothed Grain Beetles, Confused Flour Beetles, Black Carpet Beetles and Indian Meal Moth Larvae: Close room and shut off all air conditioning or ventilation equipment. Using a cold fog aerosol generator, direct discharge into areas suspected of harbouring these pests. Special attention should be to cracks, hidden surfaces under sinks, behind stoves and refrigerators, and wherever these pests are suspected of hiding. Spray until surfaces are moist with deposit. Leave room closed for one half hour. Ventilate room thoroughly before re-entry. Repeat as necessary.

Contact Spray-Diluted for use with Sprayers that give large wetting spray particles to kill Cockroaches and accessible stages of Granary insects: Granary Weevils, Rice Weevils, Confused Flour Beetles, Rusty Grain Beetles, Red Flour Beetles, Indian Meal Moth Larvae and Adults, Caddises, Grain Mites and Saw-toothed Grain Beetles: Cover or remove exposed food and close room as described above. Dilute concentrate with oil at the rate of 1 part concentrate plus 29 parts of oil and mix well. Spray outside walls of grain bins, flooring, about base of milling machinery, walls and baseboards, areas behind cabinets, around pipes and other insect harbourages using 1 gallon of spray per 1,000 square feet of surface. Force spray into all cracks and crevices. Repeat application as necessary.

For use in Dairy and Beef Barns, Swine Housing, Poultry Houses and Horse Barns:

Space Spray- Diluted for use in Aerosol Generators to kill Flies, Mosquitoes, Gnats, Small Flying Moths and Exposed Cockroaches: Cover or remove exposed food or watering troughs and close house as tightly as possible. Dilute concentrate with refined kerosene at the rate of 1 part concentrate plus 5 parts oil and mix well. Apply as a fine mist over the livestock in stanchions or holding pens or over the poultry in cages or in pens. Use a fogger or mist generator so spray is directed and applied above animals and direct spray to center of the area where animals are housed. Apply 1 ounce per 1,000 cubic feet so that spray mist is distributed uniformly throughout the entire area sprayed. Do not ventilate the area for at least 30 minutes after the spray has been applied. If used in dairy barn, aerate the barn thoroughly before milking. Repeat daily, morning and afternoon, or as required. Keep sprayer unit reservoir and nozzle clean to insure proper delivery of spray mist or fog.

Space Spray-Diluted for ordinary mechanical fogging equipment to kill Flies, Mosquitoes, Small Flying Moths and Gnats: Prepare for application as above. Dilute concentrate with refined kerosene at the rate of 1 part concentrate plus 29 parts of refined kerosene and mix well. Apply at the rate of 50 fluid ounces dilute spray (4 gallons) per 25,000 cubic feet of space above animals. Direct fog upward toward upper corners of room and ceiling. Vacate room and leave closed for 1/2 hour.

NOTE: This spray when diluted properly as described, and applied per the directions and cautions given above, conforms with Food Additive Regulations 121.1074, 121.1075 and 121.1205 and the food additive tolerances established thereunder.

ACCEPTED
AUG 13 1982
Under the Federal Insecticide, Fungicide, and Rodenticide Act, amended, by the FIFRA Act of 1972, registered under EPA Reg. No. 10807-87
