

ACCEPTED
 AUG 27 1988
 Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 10807-88

AMREP[®]

**General Purpose
 FLYING INSECT
 KILLER, .3P**

ACTIVE INGREDIENTS

Pyrethrins	0.30%
*Piperonyl Butoxide technical	1.50%
INERT INGREDIENTS:	98.20%
TOTAL:	100.00%

*Equivalent to 1.20% (butylcarbitol)(6-propylperonyl) ether and 0.03% related compounds
 CONTAINS PETROLEUM DISTILLATES

**KEEP OUT OF REACH OF CHILDREN.
 CAUTION:**

See side panel for additional precautionary statements.

STATEMENT OF PRACTICAL TREATMENT:
EYE CONTACT: Flush with water. If persistent irritation occurs, get medical attention.
SKIN CONTACT: Wash with soap and water. If persistent irritation occurs, get medical attention.
INHALATION: Remove victim to fresh air. Provide oxygen if breathing is difficult. Get medical attention.
INGESTION: Do not induce vomiting. If vomiting occurs, keep head below hips to prevent aspiration of liquid into lungs. Get medical attention.

NET CONTENTS 1 GALLON

PRECAUTIONARY STATEMENTS (HAZARDS TO HUMANS AND DOMESTIC ANIMALS)

CAUTION: Harmful if swallowed. Avoid breathing vapors of spray mist. Wear a pesticide respirator (only approved by the Mining Enforcement and Safety Administration and the National Institute for Occupational Safety and Health) under the provisions of 30 CFR Part 11. Contains petroleum distillates. If swallowed, do not induce vomiting. Get immediate medical attention. Avoid contact with skin and eyes. In case of contact, immediately flush eyes or skin with plenty of water. Obtain medical attention if irritation persists. Do not apply directly to food. Do not apply space spray while food processing is underway. Cover or remove all food processing surfaces. Thoroughly wash all food processing surfaces before re-use. Facilities and equipment in federally inspected meat and poultry plants must be washed with an effective cleaning compound followed by a potable water rinse after spraying. When using in animal housing areas, do not apply directly to food, water or feed supplements. Do not apply directly to animals. Wash teats of dairy animals before milking. Remove pests, birds, and cover fish aquariums before spraying.

STORAGE and DISPOSAL:

Storage: Do not expose product to heat, spark or open flame. Store container in a cool dry location. Do not expose product to temperature extremes. Store product in original shipping container in a locked storage area. Keep container closed when not in use. Do not contaminate water, food or feed by storage or disposal. **Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. In the event of a spill or leak, contain product with a dry absorbent and dispose of in accordance with state or local regulations. Wear protective clothing during clean up procedures. **Container Disposal:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities. **General:** The concentrate is designed for use undiluted in mechanical sprayers such as the LECO Mini-ULV or Micro-Gen which gives particles of aerosol size. It can be diluted with refined kerosenes, which meet Food Additive Regulation 121-1182 and applied in logging equipment such as the Microsol or Challenger machines that give larger than aerosol particle size. It can also be diluted with the oil specified above and applied as a contact spray to kill crawling insects shown later on this label. **Note:** When used in hospitals, patients should be removed prior to treatment. Ventilate for two hours after treatment. Do not return patients to room until after ventilation.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For Use In Homes, Restaurants, Food Processing Plants and Other Industrial Areas:
Space Spray Undiluted: To Kill Houseflies, Mosquitoes, Gnats and Small Flying Moths: Close room and shut off all air conditioning or ventilating equipment. Using a fog generator apply at the rate of 5 ounces per 1,000 cubic feet of space. Direct output from aerosol generator upward toward corners of room and ceiling. Leave room closed for 1 1/2 hour. Ventilate room thoroughly before re-entry. Repeat as necessary. **Space Spray - Diluted for Ordinary Mechanical Fogging Equipment:** To Kill Flies, Mosquitoes, Small Flying Moths and Gnats: Cover or remove exposed food and food handling surfaces. Close room and shut off all air conditioning or ventilating equipment. Dilute concentrate with oil at the rate of 1 part concentrate plus two parts of oil and mix well. Apply at the rate of 50 fl. oz. of dilute spray (4 gal.) per 25,000 cubic feet of space. Direct fog upward toward upper corners of room and ceiling area. Leave room closed for 1 1/2 hour. Do not remain in treated areas. Ventilate room thoroughly before re-entry. **Contact Spray - Diluted for use with Sprayers that give large wetting particles:** To Kill Cockroaches and accessible stages of Granary Insects (Granary Weevils, Rice Weevils, Confused Flour Beetles, Rusty Grain Beetles, Red Flour Beetles, Indian Meal Moth Larvae and Adults, Caddises, Grain Mites and Sawtoothed Grain Beetles. Cover or remove exposed food and close room as described above. Dilute concentrate with oil at the rate of 1 part concentrate plus 2 parts of oil and mix well. Spray outside walls of gran bins, flooring, about base of milling machinery, walls and baseboards, areas behind cabinets, around pipes and other insect harborage using 1 gallon of spray per 1,000 square feet of surface. Force spray into all cracks and crevices. Repeat applications as necessary.

For Use in Dairy and Beef Barns, Swine Housing, Poultry Houses and Horse Barns:
Space Spray - Undiluted for use in Aerosol Generators: To Kill Flies, Mosquitoes, Gnats, Small Flying Moths and Exposed Cockroaches: Cover or remove exposed food, feed, and watering troughs and close house as tightly as possible. Apply as a fine mist over the livestock in stanchions or holding pens or over the poultry in cages or pens. Use a fogger or mist generator so spray is directed and applied above the animals and direct spray to center of the area where animals are housed. Apply 2 ounces per 1,000 cubic feet so that spray mist is distributed uniformly throughout the entire area sprayed. Do not ventilate the area for at least 30 minutes after spray has been applied. If used in dairy barn, separate the barn thoroughly before milking. Repeat daily, morning and afternoon, or as required. Keep sprayer unit, reservoir and nozzle clean to ensure proper delivery of spray mist or fog. **Space Spray - Diluted for Ordinary Mechanical Fogging Equipment:** To Kill Flies, Mosquitoes, Small Flying Moths, Gnats: Prepare for application as above. Dilute concentrate with refined kerosene at the rate of 1 part concentrate plus 2 parts of refined kerosene and mix well. Apply at the rate of 50 fl. oz. dilute spray (4 gal.) per 25,000 cubic feet of space above animals. Direct fog upward toward corners of room and ceiling. Leave room closed for 1 1/2 hour then ventilate area.
