# WK-44 LIQUID WEED KILLER

ACTIVE INGREDIENTS:	
Bromacil (5-bromo-3-sec-butyl-6-methyluracil)	1.22%
INERT INGREDIENTS:	98.78%
TOTAL:	100.00%

**CAUTION KEEP OUT OF REACH OF CHILDREN**  
 "See side panel for additional cautions"  
 May irritate eyes, nose, throat, and skin. Avoid breathing spray mist. Avoid contact with skin, eyes, and clothing. May be harmful if swallowed. In case of contact, flush with soap and water. For eyes, flush immediately with water and consult physician.  
**Note to physician:** WK-44 is alkaline.

EPA Reg. # 6811-31  
 EPA Est. # 10807-TX-01  
 10807-GA-01

**ACCEPTED**  
 JUN 16 1981  
 Under Fungicide, Insecticide, and Plant Growth Regulator Act

**GENERAL INSTRUCTIONS:** This product is a liquid non-selective, general herbicide which is designed to be used where control of all vegetation is desired. It produces rapid top kill of all succulent vegetation. Translocation and root absorption produce extensive root kill of weeds and provides long term control. For easy application and better penetration dilute one gallon of WK-44 to 10 gallons of water and apply as directed below. Sufficient moisture from rainfall or artificial means is necessary after treatment to carry the chemical into the root of the weeds. This product is recommended for non-crop areas such as RAILROADS, HIWAYS, PIPELINES, TANK FARMS, LUMBER YARDS, FENCE ROWS and PARKING LOTS. WK-44 can be sprayed or sprinkled on. If sprayed, direct the spray to the soil at the base of the weeds and adjust for coarse spray to prevent drifting. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes or do not use same spray equipment for other purposes.

**DIRECTIONS FOR USE: ANNUAL WEEDS AND GRASS** Such as Crabgrass, Foxtail, Ryegrass, Wild Oats, Ragweed, Broomgrass, Lambsquarter, and similar weeds. Use 10 gallons of the diluted WK-44 per 750 sq. ft. (400 to 600 gal./acre).

**PERENNIAL WEEDS AND GRASSES:** Such as Smooth Brome, Quackgrass, Bluegrass, Purple Top, Dandelion, Goldenrod, Wild Carrot, and similar weeds. Use 10 gallons of the diluted WK-44 per 400 sq. ft. (900 to 1,000 gal./acre.)

**HARD TO KILL PERENNIALS:** Such as Johnson Grass, Bermuda Grass, Dallisgrass, Nutgrass, Saltgrass, Dogbane, Horsetail, Bracken Fern, and similar weeds. Use 10 gallons of the diluted WK-44 per 175 sq. ft. (2,200 to 2,400 gal./acre). Use the higher levels of dosage on absorptive soils.

**RETREATMENT:** Apply 10 gallons of the diluted WK-44 per 750 sq. ft. when Annual Weeds and Grasses reappear.

**CAUTION:** Do not apply this product on or near desirable plants or to areas where roots of desirable plants may come in contact with it. Do not use on Lawns, Walks, Driveways, or Tennis Courts or similar areas. Do not apply to frozen ground. Avoid spray drift. Do not contaminate domestic water or irrigation

Do not contaminate water by cleaning of equipment, or disposal of wastes. Do not apply in any manner not specified on this label.

Remove empty container to an authorized landfill site or bury in a safe place.
