

04 AUG 1987

Amrep, Inc.  
945 East Pleasant Run Road  
Lancaster, TX 75146

Gentlemen:

Subject: CWT 300  
EPA Registration No. 10807-103  
Your Amendment Dated May 20, 1987

The amendment referred to above, submitted in connection with registration under section 3(c)(7)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), is acceptable provided that you:

1. Submit/cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Submit two (2) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

Jeff Kempter  
Product Manager (32)  
Disinfectants Branch  
Registration Division (TS-767C)

**POLY-QUATERNARY ALGAEKIDE FOR RECIRCULATING COOLING WATER and SWIMMING POOLS**

**PRECAUTIONARY STATEMENTS: Hazards to Humans and Domestic Animals**

**DANGER: Corrosive.** Causes eye damage and skin burns. May be harmful or fatal if swallowed. May be harmful if absorbed in large amounts through skin. Do not get in eyes, on skin or clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Avoid contamination of food. Do not take internally. Wash thoroughly after handling.

**Environmental Hazards:** This pesticide is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public waters. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply according to label.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Directions For Swimming Pools:** For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using this product. For pools having just visible growth, add an initial dose of 74 to 114 fluid ounces of this product per 10,000 gal. of water and remove settled algae debris by cleaning. For treatment of freshly cleaned and filled pool, add initially 40 to 74 fluid ounces of product per 10,000 gals. of water. To maintain pools free of visible algae growth, subsequent additions of 28 fluid ounces of this product per 10,000 gals. of water should be made every 5 to 7 days after initial treatment. Uniform distribution of treatment through the water in the pool is necessary for maximum effect with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Product can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix this product with concentrated dry or liquid-chlorine products.

*S+D correct this is returned on file 12/18/86 L*

**WATER**

**CWT-300**

<b>ACTIVE INGREDIENTS:</b>	
Poly [methylolurea (dimethylimidaz) ethylene dichloride]	10.0%
<b>INERT INGREDIENTS:</b>	90.0%
	100.0%

**KEEP OUT OF REACH OF CHILDREN. DANGER**

**STATEMENT OF PRACTICAL TREATMENT**

**Skin and Eyes:** In case of contact, flush with plenty of clear water for at least 15 minutes.  
**For eyes:** Contact physician.  
**If ingested:** If swallowed, drink milk, egg whites, gelatin solution, or, if these are not available, large quantities of water. Avoid alcohol. Contact physician.  
**Note To Physicians:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsions may be needed.

FOR INDUSTRIAL AND INSTITUTIONAL USE ONLY.

*Do not return to Sale to Use for Storage by Service Only.*

EPA REG. NO. 10807-103- EPA EST. NO. 10807-GA-01/GA-02/TX-01

**Directions For Recirculating Commercial and Industrial Water Cooling Towers:** Prior to its use, systems must be cleaned to remove algae growth, microbiological slime and other deposits. An initial slug addition of 8 to 14 fluid ounces of product per 1,000 gals. of water, to provide a concentration of 48 to 120 ppm of treatment based on the total weight of water in the system is recommended. Subsequent slug additions of 1.5 to 14 fluid ounces of product per 1,000 gals. of water (12 to 120 ppm of product) should be used every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers. Uniform distribution of product throughout the water in the system is necessary for maximum effectiveness.

**STORAGE AND DISPOSAL**

**Storage:** Do not expose to temperature extremes. Store product in original shipping container in a locked storage area. Keep container closed when not in use. Do not contaminate water, food or feed by storage or disposal.

**Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. In the event of a spill or leak, contain product with a dry absorbent and dispose of in accordance with state or local regulations. Wear protective clothing during clean up procedures.

**Container Disposal:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.
