**POLY-QUATERNARY ALGAECIDE FOR RECIRCULATING COOLING WATER AND SWIMMING POOLS**

**PRECAUTIONARY STATEMENTS: Hazards to Humans and Domestic Animals**

**CAUTION** Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing.  
**STATEMENT OF PRACTICAL TREATMENT: SKIN AND EYES** In case of contact, flush with plenty of clear water for 15 minutes. **FOR EYES** Contact physician. **IF INGESTED** If swallowed, drink large quantities of water. Avoid alcohol immediately.

**ENVIRONMENTAL HAZARDS.** This pesticide is toxic to fish. Do not discharge into lakes, streams, ponds, or rivers in accordance with NPDES permit. For guidance, contact the regional office of the Environmental Protection Agency.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Directions For Swimming Pools:**

For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using this product. Just visible growth, add an initial dose of 74 to 114 fluid ounces of this product per 10,000 gal. of water and remove by cleaning. For treatment of freshly cleaned and filled pool, add initially 40 to 74 fluid ounces of product per 10,000 gal. To maintain pool's free of visible algae growth, subsequent additions of 28 fluid ounces of this product per 10,000 gal. be made every 5 to 7 days after initial treatment. Uniform distribution of treatment through the water in the pool is necessary for maximum effect with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. P in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. How product with concentrated dry or liquid chlorine products.

**Directions For Recirculating Commercial and Industrial Water Cooling Towers:**

Prior to its use, systems must be cleaned to remove algae growth, microbiological slime and other deposits. An initial dose of 6 to 14 fluid ounces of this product per 1000 gallons of water, to provide a concentration of 48 to 120 ppm of the total weight of water in the system is recommended. Subsequent slug additions of 1.5 to 14 fluid ounces of this product (12 to 120 ppm of this product) should be used every 2 to 5 days or as needed. The frequency of additions should be based upon the relative amount of bleed-off and the severity of the microbiological problem. Slug additions should be made to the water cooling towers. Uniform distribution of this product throughout the water in the system is necessary for effectiveness.

**STORAGE AND DISPOSAL**

**Storage** Do not expose to temperature extremes. Store product in original shipping container in a locked container closed when not in use. Do not contaminate water, food or feed by storage or disposal. Pesticide residue from the use of this product may be disposed of on site or at an approved waste disposal facility. In the event of a leak, contain product with a dry absorbent and dispose of in accordance with state or local regulations. Wear proper clean up procedures. **Container Disposal.** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.
