

**Precautionary Statements
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS**

DANGER

Harmful if swallowed. Avoid contact with skin or clothing. Causes eye irritation. Do not get in eyes. Wash after handling. Wear face shield and rubber gloves when handling this product. Remove and wash contaminated clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge treated effluent into lakes, streams, nor to or public waters unless in accordance with an NPDES Permit. For guidance contact your regional office of the EPA. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. When used on ships do not wash or flush freshly sprayed surfaces into adjacent waters.

STORAGE AND DISPOSAL

STORE AT TEMPERATURE ABOVE 32° F
Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.
PESTICIDE DISPOSAL — Pesticide spray mixture or rinse that cannot be used should be disposed of according to procedures approved by federal, State or local disposal authorities.
CONTAINER DISPOSAL — Under 30 gallon sizes: Triple rinse (or equivalent) and dispose of in an approved landfill or bury in a safe place. 30 gallon sizes and over: a) Reseal containers and offer for reconditioning or b) Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill or bury in a safe place.
GENERAL — Consult Federal, State or local disposal authorities for approved alternative procedures.

**ALGAE-SOL P
SWIMMING POOL
ALGICIDE**

ACCEPTED
22 MAY 1980
UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND ROBOTICIDE ACT
FOR ECONOMIC POISON REGISTER
EPA UNDER NO. 10827-24

Active Ingredients:
Alkyl (C₁₄, 58%; C₁₆, 28%; C₁₂, 14%)
dimethyl benzyl ammonium chloride 10%
Inert Ingredients: 90%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

Statement of practical treatment

IF SWALLOWED — Drink milk, egg whites, gelatin solution, or if these are not available, large quantities of water. Avoid alcohol. **CALL A PHYSICIAN. NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

IF ON SKIN — Flush with plenty of water.

IF IN EYES — Flush with plenty of water for at least 15 minutes and see a physician.

EPA Reg. No. 10827-24

EPA Est. No. 10827-TX-1

This algicide is formulated to complement swimming pools treated with normal chlorine systems. It is effective against growth of algae and being non-volatile, pool water clarity and sparkle. The residual algicide tends to stabilize the total chlorine.

This algicide is compatible with all chemicals normally used in swimming pool maintenance; however, in its concentrated form should not come into contact with high chlorine. **DO NOT MIX THIS ALGICIDE AND CHLORINE** when adding to the pool. These chemicals should be added separately.

This algicide is economical, efficient, stable

**DIRECTIONS FOR USE
GENERAL CLASSIFICATION**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For initial application use one gallon of this product per 50,000 gallons of water. Use one quart per 50,000 gallons of water fifth to seventh day depending on weather and algae growth.

The initial dose is used when filling pool at beginning of season and in a clean pool free of visible algae growth. In a pool with visible algae growth, treat with initial dose. Vacuum to remove algae debris. If visible algae are still present repeat this treatment procedure as necessary. After each rain of consequence, use recommended maintenance dose.

After each rain of consequence, add one quart of product per 50,000 gallons of water. Even though the pool may not be in use, algae growth should be controlled since a heavy algae growth is difficult to remove. The appropriate amount of algicide should be added by pouring directly into the pool. Rapid distribution will be achieved by pouring a small amount into several areas of the pool. Recirculate pool water to assure rapid dispersion.

TO DETERMINE POOL CAPACITY

Rectangular Pools — Length times width times average depth (in feet) times 7.5 equals gallons.

Round and Oval Pools — Average diameter times average depth (in feet) times 5.9 equals gallons.

Alkyl (C₁₄, 58%; C₁₆, 28%; C₁₂, 14%)
dimethyl benzyl ammonium chloride 10%

Inert ingredients: 90%

This algicide is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being non-volatile, aids in maintaining pool water clarity and sparkle. The residual effectiveness of this algicide tends to stabilize the total chemical treatment system.

This algicide is compatible with all chemicals normally used in swimming pool maintenance, however, in its concentrated form this chemical should not come into contact with high concentrations of chlorine. **DO NOT MIX THIS ALGICIDE AND CHLORINE TOGETHER** when adding to the pool. These chemicals should be handled separately.

This algicide is economical, efficient, stable

DIRECTIONS FOR USE

GENERAL CLASSIFICATION

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

For initial application use one gallon of this algicide per 25,000 gallons of water. Use one quart per 50,000 gallons of water every fifth to seventh day depending on weather and use factors.

The initial dose is used when filling pool at beginning of swimming season and in a clean pool free of visible algae. If pool has visible algae growth, treat with initial dose. Vacuum pool after 24 hours to remove algae debris. If visible algae are still present or reappear, repeat this treatment procedure as necessary. When pool is free of algae, use recommended maintenance dose.

After each rain of consequence, add one quart per 10,000 gallons water. Even though the pool may not be in use for periods of time, algae growth should be controlled since a heavy accumulation of algae growth is difficult to remove. The appropriate amount of this algicide should be added by pouring directly into the pool. More rapid distribution will be achieved by pouring a little of the specified amount into several areas of the pool. Recirculation or swimming activity will assure rapid dispersion.
