

Precautionary Statements

Hazards to Humans & Domestic Animals

Caution Harmful If Swallowed

IRRITATING TO EYES AND SKIN

Do not get on skin, in eyes or clothing. Do not allow domestic animals to graze on treated vegetation.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Keep out of lakes, streams and ponds. Do not contaminate water supplies by cleaning of equipment or disposal of wastes. Do not apply allow to drift or drain onto or near croplands or other desirable plants.

PHYSICAL OR CHEMICAL HAZARDS

Do not pour, use or spill near heat or open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container.

PESTICIDE DISPOSAL - Pesticide spray mixture or residue that cannot be used should be disposed of according to procedures approved by Federal, State or local disposal authorities.

CONTAINER DISPOSAL - Under 30 gallon sizes: Triple rinse (or equivalent) and dispose of in an approved landfill or bury in a safe place. **30 gallon sizes and over**: a) Triple rinse (or equivalent) and offer for reconditioning or b) Triple rinse (or equivalent) and offer for recycling, reconditioning, or disposal in approved landfill or bury in a safe place.

GENERAL - Consult Federal, State or local disposal authorities for approved alternative procedures.

EPA Reg. No. 10827-53
EPA Est. No. 10827-TX-1

Net Contents _____ Gallons

URO-SOL

LIQUID WEED KILLER

For General Weed Control on
Non-Crop Lands and Paved Areas

ACTIVE INGREDIENTS

Monuron Trichloroacetate (3-(p-chlorophenyl)-1,1-dimethylurea trichloroacetate) 3.15%

Aromatic Petroleum Derivative 92.80%

INERT INGREDIENTS 4.05%

Total 100.00%

CONTAINS 1/4 pound of Urox* per Gallon.

Registered Trademark of Hopkins Agricultural Chemical Co.
U.S. Patents No. 2,782,112 and 2,801,911

KEEP OUT OF REACH OF CHILDREN CAUTION

Harmful if swallowed, irritating to skin and eyes. Do not get on skin, in eyes or on clothing. Do not breathe spray mist.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. See a physician immediately.

IF INHALED: Move to fresh air area.

IF ON SKIN: Wash thoroughly with soap and water.

IF IN EYES: Flush with water for at least 15 minutes and see a physician.

DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Dilute 1-3 With Water or Herbicidal Oil Before Use

NON-CROP AREAS

For use on Non-crop land such as Right of Way, Industrial Yards, Tank Farms, Storage Areas, and Parking Lots for control of annual and perennial grasses and broad leaved weeds. The effective length of time that control will last will depend on type of soil, amount of rain, and other conditions.

RATE - Under ordinary conditions use at the rate of 6 to 12 gallons of diluted product per 1000 square feet (2/3 to 1 1/3 gallons per 1000 square feet). Under conditions where the weeds are difficult to control, use a rate of 18 gallons per 1000 square feet (1 2/3 gallons per 1000 square feet).

HOW TO APPLY - Use a sprayer which will distribute the product evenly over the area to be treated. Use a coarse spray. Application may be made when top growth is dense, but best results will be obtained when weeds are short or when excess growth has been removed before applying.

WHEN TO APPLY - Best results will be obtained if applied shortly after the time plant growth begins. Rain or thorough watering after application will cause the material to move to the root zone and control weeds.

DO NOT allow contact with fertilizers, insecticides, fungicides, or herbicides. Application equipment should be thoroughly cleaned with water to prevent corrosion. Equipment which has been used for application of this product should not be used for applying insecticides, fungicides, or other agricultural chemicals as plant injury may result.

This product is highly effective as a contact spray for control of annual and perennial grasses. Temporary non-productivity of soil may be caused by applications of the product. This condition usually disappears after a winter period.

Some species of perennial weeds are difficult to control. A second application may be necessary if regrowth occurs.

IMPORTANT - Wash sprayer thoroughly after use to remove residue and to reduce corrosion. Use of this product in emulsion form minimizes corrosion of equipment. If oil water emulsion commercial equipment should be coated with an asphalt or thoroughly wash exterior of equipment at end of each season. Protective coating of oil each week or as often as practical is down for week end, wash exterior and coat with oil. For season storage, wash inside and outside and coat with oil.

INDUSTRIAL SOLVENTS

DIVISION OF CHEMICAL SPECIALTIES, INC. • SAN MARCOS, TEXAS

Statements

Domestic Animals
Do Not Feed If Swallowed

Do not allow treated vegetation

Keep out of lakes, streams, water supplies by clean up wastes. Do not apply near croplands, or other

Do not use near open flame

DISPOSAL

Do not store or feed by storage or prohibited. Do not reuse

Do not spray mixture or rinseate disposed of according to State or local disposal

For 30 gallon sizes, triple rinse in an approved landfill. For 5 and 10 sizes, triple rinse and over at resealing, conditioning or recycling, reconditioning or reuse in a safe place.

LIQUID WEED KILLER

For General Weed Control on Non-Crop Lands and Paved Areas

ACTIVE INGREDIENTS:

Monuron Trichloroacetate (3-(p-chlorophenyl)-1,1-dimethylurea trichloroacetate) **3.15%**
Aromatic Petroleum Derivative **92.80%**

INERT INGREDIENTS **4.05%**
Total **100.00%**

CONTAINS 1 1/2 pound of Urox* per Gallon.

Registered Trademark of Hopkins Agricultural Chemical Co.
U.S. Patents No. 2,782,112 and 2,801,911

KEEP OUT OF REACH OF CHILDREN CAUTION

Harmful if swallowed, irritating to skin and eyes. Do not get on skin, in eyes or on clothing. Do not breathe spray, mist.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED: Do not induce vomiting. — See a physician immediately.
IF INHALED: Move to fresh air area.
IF ON SKIN: Wash thoroughly with soap and water.
IF IN EYES: Flush with water for at least 15 minutes and see a physician.

DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Dilute 1-3 With Water or Herbicidal Oil Before Using

NON-CROP AREAS

For use on Non-crop land such as Right of Ways, Industrial Plants, Lumber Yards, Tank Farms, Storage Areas, and Parking Lots for control of most annual and perennial grasses and broad leaved weeds. The effectiveness and length of time that control will last will depend on type of soil, amount of rain, and other conditions.

RATE: Under ordinary conditions use at the rate of 6 to 12 gallons of diluted product per 1,000 square feet (2/3 to 1 1/3 gal per 100 square feet). Under conditions where the weeds are difficult to control use at the rate of 18 gallons per 1,000 square feet (1 2/3 gallons per 100 square feet).

HOW TO APPLY: Use a sprayer which will distribute the required amount evenly over the area to be treated. Use a coarse spray to reduce drift. Application may be made when top growth is dense, but better control will be obtained when weeds are short or when excess growth is mowed and removed before applying.

WHEN TO APPLY: Best results will be obtained if applied shortly before or at the time plant growth begins. Rain or thorough watering after application will cause the material to move to the root zone and thus speed up control.

DO NOT allow contact with fertilizers, insecticides, fungicides or seeds. Application equipment should be thoroughly cleaned with a detergent and water to prevent corrosion. Equipment which has been used to apply this product should not be used for applying insecticides, fungicides, fertilizers or other agricultural chemicals as plant injury may result.

This product is highly effective as a contact spray for control of weeds and grasses. Temporary non-productivity of soil may be caused by heavy applications of the product; this condition usually disappears in the "over winter" period.

Some species of perennial weeds are difficult to control and retreatment may be necessary if regrowth occurs.

IMPORTANT: Wash sprayer thoroughly after use to remove all herbicidal solution and to reduce corrosion. Use of this product as an oil-water emulsion minimizes corrosion of equipment. If oil-water emulsion is not used, commercial equipment should be coated with an asphaltic base paint or thoroughly wash exterior of equipment at end of each day and apply protective coating of oil each week or as often as practical. When equipment is down for week-end, wash exterior and coat with oil; for end of season storage, wash inside and outside and coat with oil.
