"STERI PLUS DISINFECTANT" is a balanced formulation combining E.C.S.'s true odor counteractants, a non-ionic synthetic detergent, a quaternary ammonium germicide and an organic chelating agent . . . for effective, cleaning disinfecting and odor counteracting in one labor-saving operation.

"Steri Plus Disinfectant" is unexcelled for washing hard surfaces such as porcelain, tile, glass, stainless steel, chrome, etc. It will not adversely affect painted varnished or lacquered surfaces. Because "Steri Plus Disinfectant" rinses spot free it is particularly suitable for wood, linoleum, rubber cork, vinyl and asphalt tile floors. Its superior rinsing qualities make it an excellent cleaner for marble and tarrazzo.

As a detergent "Steri Plus Disinfectant" (a) loosens soil through superior wetting and penetrating action; (b) suspends insoluble matter in solution, and (c) emulsifies oil and grease, low foaming "Steri Plus Disinfectant" leaves surfaces spot free and film free, with a minimum of rinsing.

**Directions for Use:**

Disinfecting and cleaning Hospitals, Nursing Home, Hotels, Institutions, Schools, kitchens, walls and floors, rest rooms, locker rooms, garbage pails, sink tops and offices; use 2 ounces "Steri Plus Disinfectant" per 1 gallon of water (1 to 64). At this level "Steri Plus Disinfectant" provides 700ppm effective germicidal activity and is effective against Pseudomonas aeruginosa PRD-10. This has been substantiated by the AOAC use dilution confirmation test.

Where infectious diseases are present rinse all surfaces and repeat treatment as directed.

"Steri Plus Disinfectant" provides an air-refreshed effect through true odor neutralization. It does not merely mask odors.

Rinse empty container thoroughly and discard.

**WARNING**

Harmful if swallowed. May cause eye damage. Causes skin irritation. Do not get in eyes, on skin or on clothing. Avoid contamination of food.

**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes get medical attention. Remove and wash contaminated clothing before reuse.

If swallowed, drink a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.
