

**STERI PLUS II** is a balanced formulation combining ECS's true odor counteractants, a nonionic synthetic detergent, dual quaternary ammonium chloride germicides, an organic chelating agent and alkaline builders . . . for effective cleaning, disinfecting and odor control in one labor saving operation. **STERI PLUS II** helps in reducing the hazard of cross-infection from environmental hard surfaces.

**STERI PLUS II** is excellent for washing hard surfaces such as floors and walls, porcelain, tile, glass, stainless steel and chrome. It will not adversely affect painted, varnished or lacquered surfaces. It is particularly suitable for linoleum, rubber, cork, vinyl and asphalt tile floors, marble and terrazzo, and may be used safely on sealed wood.

As a detergent, **STERI PLUS II** loosens soil through superior wetting and penetrating action, suspends insoluble matter in solution and emulsifies oil and grease. **STERI PLUS II** leaves surfaces spot free and film free.

**STERI PLUS II** is recommended for hospitals, nursing homes, mental institutions, schools, veterinary establishments, hotels and motels -- for disinfecting floors and walls, operating rooms, kitchens and rest rooms, locker rooms, offices -- for use on sink tops, garbage pails, telephones, and bed pans.

A potable water rinse prior to reuse is required when **STERI PLUS II** is used for sanitizing at a quaternary level of no more than 200 ppm on previously cleaned food processing and food contact items. See Directions For Use.

**STERI PLUS II** provides an air-refreshed effect through odor counteractions. It does not merely mask odors.

## DIRECTIONS FOR USE

### To Disinfect

Use two ounces of Steri Plus II per gallon of water. Apply with mop, sponge or cloth to floors, walls and other hard surfaces. A pre-cleaning step is recommended if the surface contains heavy soil or organic matter.

### To Sanitize

Use two (2) ounces of Steri Plus II per 3½ gals. of water on previously cleaned food equipment or food contact items. This gives a concentration of 200 ppm of quaternary. It must be followed by a rinse with potable water prior to reuse.

### DANGER: Keep Out Of Reach Of Children:

Corrosive. Causes eye damage and skin irritation. Do not get in eyes, on skin or on clothing. Protect eyes and skin when handling. Harmful if swallowed. Avoid contamination of food.

### First Aid:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Call a physician immediately.

### Note To Physician:

Probable mucosal damage may contra-indicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

Rinse empty container thoroughly with water and discard.
