

# BAF-TROL

Active ingredient: Didecyl dimethyl ammonium chloride..... 18.0%  
Inert ingredient..... 82.0%

**DANGER**  
KEEP OUT OF REACH OF CHILDREN

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if swallowed. Avoid contact with skin and eyes. Wear goggles or face shield and rubber gloves when handling. May cause severe eye damage and skin irritation. In case of contact, flush immediately with plenty of water for at least 10 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, DO NOT induce vomiting, drink large amounts of fluids and call a physician. Avoid contamination of food.

### ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this active ingredient into rivers, streams, ponds, ditches, creeks, or public waters unless the product is specifically permitted and permitted in an NPDES permit. Do not discharge effluent containing this pesticide into streams without a permit from the relevant treatment plant authority. For more information, contact your State Water Board or Regional Office of the EPA.

EPA REG. NO. 10867-2  
EPA EST. NO. 10867-001

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. BAF-TROL is a specially prepared product for controlling algae, bacteria, and fungus in industrial and commercial recirculating water cooling towers, evaporative condensers and air washers. Prior to its use in air washers, the system should be pre-cleaned, i.e., by applying a suitable detergent solution to the air washer tank. Let system run 2 hours with fan off. Dump and flush tank. Check all nozzles. Remove plugged nozzles and clean manually. Air washer waters subject to acidification from tobacco dust or other acidifying materials require periodic adjustment of pH with alkaline additives.

**COOLING TOWERS & EVAPORATIVE CONDENSERS—Initial Dose:** When the system is noticeably fouled, apply 1 to 1 1/2 quarts of BAF-TROL per 1000 gallons of water in the system. Repeat until control is achieved. **Subsequent Dose:** When microbial control is evident, add 1 to 2 pints of BAF-TROL per 1000 gallons of water in the system every 4 to 7 days or as needed. Heavy contaminations of slime or scale must be removed manually.

**AIR WASHERS—Initial Dose:** When the system is noticeably fouled, apply 1 to 1 1/2 quarts of BAF-TROL per 1000 gallons of water in the system. Repeat until control is achieved. **Subsequent Dose:** When microbial control is evident, add 1 to 1 1/2 pints of BAF-TROL per 1000 gallons of water in the system every 3 days or as needed.

Heavy contaminations of slime or scale must be removed manually. BAF-TROL may be applied in the tower sump, tower basin or air distribution decks.
