BAF-100

Methyldodecylbenzyl trimethyl ammonium chloride 80% and
 Methyldodecylxylene bis (trimethyl ammonium chloride) 20% 3.02%
 Inert Ingredients 96.98%
 Contains 0.25 pounds of active ingredients per gallon.

DANGER

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

May be absorbed thru the skin, causes skin irritations or damage to the eyes. Avoid contact with skin and eyes. Do not take internally. Avoid contamination with food. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, DO NOT induce vomiting; drink large amounts of fluids and call a physician.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this active ingredient into lakes, streams, ponds, estuaries, oceans, or public waters unless this product is specifically identified and addressed in an NPDES permit. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

EPA REG. NO. 10867-5
 EPA EST. NO. 10867-TN-01

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. BAF-100 is a specially prepared product for controlling bacteria and fungus in industrial and commercial recirculating water cooling towers, evaporative condensers and air washers. Prior to its use in air washers, the system should be pre-cleaned, if dirty, by applying a suitable detergent solution to the air washer tank. Let system run 2 hours with fan off. Dump and flush tank. Check all nozzles. Remove plugged nozzles and clean manually. Air washer waters subject to acidification from tobacco dust or other acidifying materials require periodic adjustment of pH with alkaline additives. An initial slug addition of 3 to 4 quarts of BAF-100 should be used per 1000 gallons of water in the system, depending on the condition of the system at the time of initial slug addition. Subsequent slug additions require application of the product in a quantity from 1 1/2 to 2 quarts per 1000 gallons of water in the system, to be repeated weekly or as needed. If microbial growth is noticed, the initial slug addition is used and repeated as needed until control is evident. When or where microbial growths are under control, use the subsequent slug addition range. Heavy contaminations of slime or scale must be removed manually. BAF-100 may be added in the tower sump, tower basin, or on distribution decks.

ACCEPTED
 JUN 12 1986
 Under the Federal Insecticide,
 Fungicide, and Rodenticide Act,
 as amended, for the pesticide
 registered under
 EPA Reg. No. 10867-5

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.
STORAGE: Do not stack more than four drums high. Leaking or damaged drums should be placed in overpack drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.
PROHIBITIONS: This product is corrosive to mild steel. Do not store or transport in unlined metal containers.
PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
CONTAINER DISPOSAL:
PLASTIC: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration or, if allowed by State and Local authorities, by burning. If burned, stay out of smoke.
GENERAL: Consult Federal, State or Local Disposal authorities for approved alternative procedures.
