

BAF-KON

COMPOSITION

	Percent By Weight
Active Ingredients	9.0 percent
Sodium pentachlorophenate	7.9 percent
Sodium salts of other chlorophenols	1.1 percent
Inert Ingredients	91.0 percent
Active Ingredients Per Gallon of Product	0.80 lbs.

APPLICATION

BAF-KON is a specially prepared product for controlling algae, bacteria and fungus in industrial and commercial recirculating cooling towers, evaporative condensers and air washers. Prior to its use in air washers, the system should be pre-cleaned, if dirty, by applying a suitable detergent solution to the air washer tank. Let system run 2 hours with fan off. Dump and flush tank. Check all nozzles. Remove plugged nozzles and clean manually. Air washer waters subject to acidification from tobacco dust or other acidifying materials require periodic adjustment of pH with alkaline additives. An initial slug addition of 1 2/3 to 3 quarts of BAF-KON per 1000 gallons of water in the system should be used, depending on the condition of the system at the time of initial slug addition. Subsequent slug additions require application of the product in a quantity from 26 fluid ounces to 1-2 1/3 quarts per 1000 gallons of water in the system to be repeated weekly or as needed. If microbial growth is noticed, the initial slug addition is used and repeated as needed until no growth is evident. When or where microbial growths are under control, use the subsequent slug addition. Heavy contaminations of slime or scale must be removed manually. BAF-KON may be added to: lower sump, tower basin or on distribution decks.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful or fatal if swallowed or absorbed thru the skin. May be absorbed thru the skin from solutions and causes skin irritations or damage to the eyes. Do not get in the eyes, on skin or clothing. Do not take internally. Avoid contamination with food. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, DO NOT induce vomiting; drink large amounts of fluids and call a physician.

This product is toxic to fish and wildlife. Do not discharge treated effluent directly into lakes, streams or ponds.

CONTAINER DISPOSAL

Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.
