PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION

Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing spray mist or contact with skin. Wash thoroughly after using. Avoid storage near food or feed. Do not spray on pets, humans or other animals.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

Do not use in edible product areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

NOTE TO PHYSICIAN: Carbaryl is a moderate reversible Cholinesterase inhibitor. Atropine is antidotal.

PHYSICAL OR CHEMICAL HAZARDS WARNING: Flammable! Contents under pressure. Do not use near fire, sparks or flame. Do not puncture or operate containers. Exposure to temperatures above 130° F. may cause bursting.

EPA REG. NO. 10882-13

EPA EST. NO. 9502-NJ-1

KEEP OUT OF REACH OF CHILDREN

CAUTION

Harmful if swallowed, inhaled or absorbed through the skin.

See side panel for additional precautions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

DISPOSAL: Wrap container and put in trash collection. Do not reuse empty container.

To operate remove protective cap and depress button, being sure to aim spray opening at the location to be sprayed. Direct spray at insects wherever possible, and under eaves, into nests, cracks, holes or crevices wherever insects are noticed. Spray nests in the early morning or late evening when the nests are at rest. Spray for about 10 seconds or until surface is moist from insecticide. To prevent entrance of insects into the house spray around points where outside plumbing, faucets, enter the house.

Kills Wasps, Hornets and Yellow Jackets
This spray is fast acting when insects are hit directly. Allow about 24 hours for those insects which were not directly hit by spray to leave the area. If insects should return to the treated area, spray again. This container delivers a stream type spray, making it possible for the operator to stay back from the places sprayed.
