

ALGAE-TROL R

COMPOSITION

Active Ingredient	Percent By Weight
Copper Sulfate	6.93 percent
Inert Ingredient	93.07 percent

APPLICATION

ALGAE TROL R is a specially prepared product for controlling algae and fungi in industrial and commercial recirculating water cooling towers, evaporative condensers and air washers. Prior to its use in air washers, the system should be pre-cleaned, if dirty, by applying a suitable detergent solution to the air washer tank. Let system run 2 hours with fan off. Dump and flush tank. Check all nozzles. Remove plugged nozzles and clean manually. Air washer waters subject to acidification from tobacco dust or other acidifying materials require periodic adjustment of pH with alkaline additives. An initial slug addition of 2 to 3 quarts of BAF TROL per 1000 gallons of water should be used, depending on the condition of the system at the time of initial slug addition. Subsequent slug additions of 1 to 1.5 quarts per 1000 gallons of water in the system, to be repeated weekly or as needed. If microbial growth is observed, the initial slug addition is used and repeated as needed until growth is prevented. When or once microbial growths are under control, use the subsequent slug additions. Heavy contamination of slime or scale must be removed manually. ALGAE TROL R may be added in the tower sump, tower basin, or in distribution decks.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Avoid contact with eyes, nose, mouth, skin, and clothing. If contact occurs, flush immediately with plenty of water. Wash thoroughly with soap and water. If contact with eyes occurs, flush with plenty of water for at least 15 minutes. Remove and discard contaminated clothing before reuse. If swallowed, DO NOT induce vomiting. If inhaled, get fresh air and call a physician. Avoid food contamination.

This product is toxic to fish. Avoid effluent streams or ponds. Do not discharge into streams or ponds.

CONTAINER DISPOSAL

Do not reuse containers. Destroy by puncturing or crushing. Do not burn or incinerate.
