POOL CHLORINE

FOR SWIMMING POOLS

Active Ingredient: Sodium Hypochlorite 12.1% BY WT.
Inert Ingredient: 87.9% BY WT.

DIRECTIONS: For swimming pool sanitation and maintenance, add 1 pound of this product to 150,000 gallons of pool water. This will provide approximately 1 PPM (part per million) of free residual. For effective sanitation, maintain a free residual of 0.6 to 1.0 PPM. Add chlorine to pool in evening for maximum effectiveness. For best results, with an available test kit, check pool water frequently and adjust chlorine levels to meet the required level of available chlorine.

WARNING

KEEP OUT OF THE REACH OF CHILDREN
