SPAGARD

CLORINATING SANITIZER

ACTIVE INGREDIENT:
SODIUM DICHLORO-S-TRIAZINE TRIONE 100%

EPA REG. NO. 10697-9-AA
EPA EST. NO. 10697-CA-1

**KEEP OUT OF REACH OF CHILDREN
DANGER**

PRACTICAL TREATMENT (FIRST AID) If swallowed: Feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately.
If on skin: Brush off excess chemicals and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.
If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

Net Weight 2 lbs.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS STRONG OXIDIZING AGENT:

Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with metals, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible isolate container in open or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL:

Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Spas and hot tubs are a popular way to enjoy leisure time. Due to the use patterns, they require special attention to maintain sanitary conditions. There are four basic conditions in hot tub and spa management which require directions:

START UP (with untreated water) Add 4 teaspoons per 500 gallons, broadcast directly across water with filter and pump running. The next day, check the chlorine residual with a test kit. If the reading is between 1.5-3.0 ppm you may use the spa or hot tub. If the reading is below this level, repeat treatment until the 1.5-3.0 ppm residual is obtained. Do not use until the required residual is reached.

MAINTENANCE Add 1 tsp daily or as needed. Use a test kit and adjust dosage if necessary.

IN USE: Check chlorine residual before starting spa heater and every 20-30 minutes during use. Add chemical whenever residual is 1.5 ppm or less at the rate of 1 tsp per 500 gallons.

Maintain pH between 7.2-7.6

SUPERCHLORINATION: After heavy use, rain storms, dust storms, contamination, and at least every 7-10 days superchlorinate or shock the spa or hot tub. Superchlorination is the addition of several times the normal amount of chlorinating chemical to destroy combined chlorine residuals, perspiration, and other chemicals which may build up in the pool water. Do not use again until chlorine residual is back within the 1.5-3.0 ppm range.

Some helpful hints for maintaining your spa in crystal clear condition are as follows: (1) Shower before using to remove excess perspiration and body oils. (2) Do not use soap or shampoo in spa. (3) Do not use other chemicals except for pH control. Some proprietary chemicals use up the chlorine residual and/or cause foaming.

Calculating capacity in gallons: Rectangular: length x width x average depth (in feet) x 7.5 Round: Diameter x diameter x depth (in feet) x 5.9 Irregular: Estimate with above formula.

1 oz. will provide 1.6 ppm available chlorine per 500 gallons. 1 oz. = 5 teaspoons.
