SPA GARD Chlorinating Sanitizer

SPA GARD Chlorinating Sanitizer

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Irritant. Causes skin and eye damage. May be fatal if swallowed and enters respiratory tract. Avoid breathing dust. Avoid contact with eyes, nose and throat. Avoid contact with clothing. Wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not allow this product to enter streams, rivers, or other bodies of water. Do not allow this product to enter the ground. Do not allow this product to enter the sewerage system.

STRONG OXIDIZING AGENT: Mix only with water. Use clean dry vessels. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire, explosion, or inflammation with moisture, organic matter, or other substances. May start a chemical reaction with generation of heat, flame, and toxic gases, and possible generation of fire and explosion. In case of container rupture or decomposition, do not reuse container if possible. Use container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL: Keep this product dry in a tightly closed container. When not in use, store in a cool, dry, well ventilated area away from heat and open flame. In case of decomposition, isolate container if possible and flood with large amounts of water to dissolve all materials before disposal. Do not reuse empty container but place in hazardous waste disposal container. Do not reuse empty container but place in hazardous waste disposal container. Do not reuse empty container but place in hazardous waste disposal container. Do not reuse empty container but place in hazardous waste disposal container.

DIRECTIONS FOR USE:

Always use this product in a well ventilated area. Do not use this product in a confined space.

START UP: Add 4 teaspoons per 400 gallons. Turn on filter and pump. The next day check the chlorine level with a test kit. If the reading is between 1.5-3.0 ppm you may use the pool. If the reading is below this level, repeat treatment until the 1.5-3.0 ppm residual is obtained. Do not use until the required residual is reached. **MAINTENANCE:** Add 1 tsp daily or as needed. Use a test kit and adjust dosage if necessary. **IN USE:** Check chlorine residual before starting. Add chemical whenever the level is 1.5 ppm or less at the rate of 1 tsp per 400 gallons. Maintain pH between 7.2-7.6. **SUPERCHELORINATION:** After heavy use, rain storms, dust storms, or other pollution and at least every 7-10 days superchlorinate or shock the pool. This superchlorination is the addition of several times the normal amount of chlorinating chemical to destroy combined chlorine residuals, perspiration, and other chemicals which may build up in the pool water.

Do not use again until chlorine residual is back within the 1.5 - 3.0 ppm range.

For more information call 1-800-4-A-SPAS or write to HASA, Inc., 23117 Drayton St., Hayward, CA 94541.

ACTIVE INGREDIENT
Sodium Dichloro S-Triazine Trione 99.0%
INERT INGREDIENTS 1.0%

KEEP OUT OF REACH OF CHILDREN DANGER
