

was

WASP KILLER

DIRECTIONS

Kills Wasps, Hornets and Yellow Jackets. This spray is fast acting when insects are hit directly. Allow **about 24 hours** for those insects which were not directly hit by spray to leave the area. If insects should return to the treated area, spray again. This container delivers a stream type spray, making it possible for the operator to stay back from the places sprayed.

This formulation utilizes pyrethrins, piperonyl butoxide and a carbamate type insecticide in combination particularly effective on this class of insects.

DIRECTIONS

To operate, remove protective cap and depress button, being sure to aim spray opening at the location to be sprayed. Direct spray at insects whenever possible and under eaves, into nests, cracks, holes or crevices where insects are noticed. Spray for about 10 seconds or until surface is moist from insecticide. To prevent entrance of insects into the house spray around points where outside plumbing, faucets enter the house and into any cracks or crevices in foundation as well as around doors and ledges.

ACTIVE INGREDIENTS:

Pyrethrins	0.10%
Piperonyl Butoxide	0.10%
Carbamate Insecticide	0.50%
Inert Ingredients	99.30%
