Mr. W.S. Pryor
S.O.S. Products Company
East Greenville, PA 18041

Dear Mr. Pryor:

Subject: Amendment - Revised Labeling
Rootout (For Killing Roots in Sewers)
EPA Registration No. 10906-1
Your Submission Dated November 17, 1986

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable provided you:

1. Make the following changes before releasing the product for shipment bearing the amended labeling.

a. Reinstate Environmental Hazards language from draft labeling dated September 30, 1986.

This pesticide is toxic to fish and aquatic organisms. Do not apply to water except as specified on labeling.

b. Move the statement "It is a violation . . ." so that it immediately follows the heading "Directions."

c. Add "Keep Out of the Reach of Children" to front panel.

2. Submit one (1) copy of final printed labeling incorporating the changes above.

EPA Reg. No. 10900-1

ROOTOUT is an easy, remarkable, inexpensive chemical means of killing Fungi, Slime and Roots.

The roots of trees and shrubs in their search for food and water penetrate and clog conduits, sanitary sewers and storm drains. **ROOTOUT** when used as directed is then absorbed into the roots which are killed and are eventually decomposed and washed away leaving drains and sewers open.

HOW MUCH ROOTOUT TO USE

PREVENTIVE TREATMENTS: 2 lbs. annually (spring and fall) will help keep sewer lines open free flowing.

PARTIAL STOPPAGE is usually corrected with one application of 2 to 4 lbs.

COMPLETE STOPPAGE requires 6 lbs. at one time or 4 lbs. weekly for 2 or 3 weeks. The line must be partially opened by use of a sewer rod to allow flow of **ROOTOUT**. **ROOTOUT**'s action clears most stoppages but immediate results should not be expected as some time is required to kill the root, following treatment.

DIRECTIONS

ROOTOUT has been used successfully by thousands of satisfied users. **ROOTOUT** is recommended for use in lines leading to cesspools and septic tanks. (It is important to follow the Directions carefully.)

FOR HOUSE PIPE LINES: Pour Contents of **ROOTOUT** into toilet bowl nearest to sewer line 1/2 lb. at a time. Flush for each 1/2 lb. so crystals will be carried to obstruction in lines leading to sewer. It's best to apply **ROOTOUT** late in the evening before retiring when waste facilities are not being used. **NEVER POUR INTO SINK OR TUB DRAINS.**

FOR STORM DRAINS: Empty 2 lb. box of **ROOTOUT** and use water hose to carry crystals to obstruction.

FOR SLIME AND FUNGI IN SEWER PUMPS: Slime and fungi are contributing causes of odors and pump trouble. Pour 2 lbs. **ROOTOUT** into cloth bag and place in inlet of storage well.
