BRITZ BT SULFUR 25 D is a biological insecticide intended for use against chewing larvae (caterpillars) of certain lepidopterous species.

Apply recommended amounts when air is calm, using ground equipment, aircraft, or hand duster. Apply at first sign of infestation and repeat at weekly intervals when needed to maintain control. Good underleaf coverage is essential since the insect must ingest BT Sulfur 25 Dust. After eating BT Sulfur 25 Dust, some insects stop feeding but may otherwise appear to be unaffected for several days. Use the higher recommendations against very heavy infestations, or where it is difficult to obtain good coverage due to rank foliage. BT Sulfur 25 Dust is exempt from tolerance requirements, and may be applied in recommended amounts up to the day of harvest.

**CAUTION:** Applications of sulfur should not be made just prior to or during periods of high summer temperatures. Do not make applications within 2 weeks of an oil spray. Do not use or allow this material to drift onto sulfur sensitive Melons, Squash, Cucumbers, Apricots, Spinach or other plants which may be injured by sulfur. Concord and other labrusca type grapes may be injured by sulfur.

DO NOT MIX OR DILUTE WITH OTHER PRODUCTS.  
THOROUGH COVERAGE ESSENTIAL WHEN USING BT SULFUR 25 DUST
