Gentlemen:

Subject: Racienda Malathion 50
EPA Registration No. 11037-11
Your Labeling Submitted Dated June 13, 1990

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided that you:

- Make the labeling changes listed below before you release the product for shipment bearing the revised labeling:
 - a. Reinstate the following bee caution statement which appeared on your label accepted February 28, 1989:

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

b. Update your current wetlands statement to read as follows:

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark.

2. Submit five (5) copies of your final printed label before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). You release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

It is noted that there are several uses appearing on your label which are also listed in the *Pederal Register* notice of March 18, 1991. This notice announced the Malathion Reregistration Task Force proposal to support only certain uses of the chemical.

In the event some or all of these uses are not supported by your supplier, such uses must be deleted from your label or appropriate steps taken to provide the necessary data. Refer to the letter of February 25, 1991 from the Special Review and Reregistration Division addressed to all registrants of malathion products.

Sincerely yours,

Robert A. Forrest Product Manager (14) Insecticide-Rodenticide Branch Registration Division (H7505C)
