

**PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS
AND DOMESTIC ANIMALS:
DANGER**

THIS FUMIGANT IS A HIGHLY HAZARDOUS MATERIAL AND MUST BE HANDLED WITH CARE ONLY BY THOSE INDIVIDUALS EXPERIENCED WITH ITS PROPER USE. CONSULT YOUR DEALER REPRESENTATIVE OR TRICAL INCORPORATED FOR CORRECT PROCEDURE. BEFORE USING, READ AND FOLLOW ALL LABEL DIRECTIONS AND PRODUCT LITERATURE SPECIFIC TO YOUR PARTICULAR REQUIREMENTS.

**EXTREMELY HAZARDOUS LIQUID AND VAPOR
UNDER PRESSURE
INHALATION MAY BE FATAL OR CAUSE
DELAYED LUNG INJURY
LIQUID AND VAPOR CAUSE BURNS WHICH
MAY BE DELAYED**

The characteristic odor of this fumigant has the capacity to cause marked irritation to the upper respiratory tract and is a strong irritant to the eyes. Inhalation of a concentration of 100 ppm for 15 minutes may cause delayed lung injury. Inhalation of a concentration of 100 ppm for 15 minutes may cause delayed lung injury. Inhalation of a concentration of 100 ppm for 15 minutes may cause delayed lung injury.

**PRECAUTIONS TO FOLLOW
PRIOR TO FUMIGATION:**

1. Before using this fumigant, read and follow all directions on the label and in this literature.
2. Comply with all applicable local, state and federal regulations and obtain approval from the appropriate regulatory agency as required.
3. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant.
4. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant.
5. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant.
6. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant.
7. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant.
8. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant.
9. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant. Do not use this fumigant in any area where it may be in contact with food, feed, or other materials that may be contaminated by the fumigant.

RESPIRATORY EXPOSURE

1. **RESPIRATORY PROTECTION:** Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
2. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
3. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
4. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
5. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
6. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
7. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
8. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
9. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.

EYE EXPOSURE

1. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
2. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
3. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
4. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
5. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
6. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
7. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
8. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
9. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.

SKIN EXPOSURE

1. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
2. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
3. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
4. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
5. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
6. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
7. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
8. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.
9. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used. Do not breathe fumes. A gas mask must be used in any area where the fumigant is being used.

STATEMENT OF PRACTICAL TREATMENT

IF INHALED—Carry Patient To Fresh Air. Call Physician At Once. Make Sure Patient Can Breathe Freely. Keep Patient Warm. Give Artificial Respiration If Breathing Has Stopped. Oxygen Should Be Administered Only By Trained Personnel.

IF ON SKIN—Immediately Remove All Contaminated Skin Clothing, Including Shoes, Clothing And Adhesive Or Other Bandages. Wash Skin Thoroughly With Soap And Water. If Irritation Or Burns Develop, Wash With Soap And Water. Do Not Rub Skin Or Clothing Contaminated With Fumigant.

IF IN EYES—Immediately Flush With Plenty Of Water For At Least 15 Minutes. Do Not Rub Eyes.

NOTE TO PHYSICIAN: Keep Patient Awake And Alert. Do Not Give Food Or Drink Until Patient Is Fully Recovered.

PRECAUTIONAL USUARIO: No debe respirar los vapores. No debe tocar la piel o la ropa contaminada. No debe tocar los ojos. No debe tocar la boca. No debe tocar la nariz. No debe tocar la garganta. No debe tocar la piel o la ropa contaminada.

TRANSLATION: Do not breathe fumes. Do not touch skin or clothing contaminated. Do not touch eyes. Do not touch mouth. Do not touch nose. Do not touch throat. Do not touch skin or clothing contaminated.

HANDLING PRECAUTIONS CONTINUED
PRECAUTIONS TO FOLLOW
DURING FUMIGATION:

1. Do not enter the fumigated area until the fumigant has been removed.
 2. Do not breathe the fumigant.
 3. Do not touch the fumigant.
 4. Do not use the fumigant in a confined space.
 5. Do not use the fumigant in a poorly ventilated area.
 6. Do not use the fumigant in a room with a fire hazard.
 7. Do not use the fumigant in a room with a flammable gas hazard.
 8. Do not use the fumigant in a room with a toxic gas hazard.
 9. Do not use the fumigant in a room with a corrosive gas hazard.
 10. Do not use the fumigant in a room with a radioactive gas hazard.

PRECAUTIONS TO FOLLOW AFTER FUMIGATION:

1. Do not enter the fumigated area until the fumigant has been removed.
 2. Do not breathe the fumigant.
 3. Do not touch the fumigant.
 4. Do not use the fumigant in a confined space.
 5. Do not use the fumigant in a poorly ventilated area.
 6. Do not use the fumigant in a room with a fire hazard.
 7. Do not use the fumigant in a room with a flammable gas hazard.
 8. Do not use the fumigant in a room with a toxic gas hazard.
 9. Do not use the fumigant in a room with a corrosive gas hazard.
 10. Do not use the fumigant in a room with a radioactive gas hazard.

CHEMICAL HAZARD

DIRECTIONS FOR USE

STORAGE AND RETURN
OF FUMIGANT CYLINDERS

STORAGE

1. Store cylinders in a well-ventilated area.
 2. Do not store cylinders in a confined space.
 3. Do not store cylinders in a poorly ventilated area.
 4. Do not store cylinders in a room with a fire hazard.
 5. Do not store cylinders in a room with a flammable gas hazard.
 6. Do not store cylinders in a room with a toxic gas hazard.
 7. Do not store cylinders in a room with a corrosive gas hazard.
 8. Do not store cylinders in a room with a radioactive gas hazard.

RETURN OF CYLINDERS

1. Return cylinders to the supplier.
 2. Do not return cylinders to the supplier if they are damaged.
 3. Do not return cylinders to the supplier if they are empty.

SHIPPING

1. Ship cylinders in a well-ventilated container.
 2. Do not ship cylinders in a confined space.
 3. Do not ship cylinders in a poorly ventilated area.
 4. Do not ship cylinders in a room with a fire hazard.
 5. Do not ship cylinders in a room with a flammable gas hazard.
 6. Do not ship cylinders in a room with a toxic gas hazard.
 7. Do not ship cylinders in a room with a corrosive gas hazard.
 8. Do not ship cylinders in a room with a radioactive gas hazard.

HANDLING

1. Do not handle cylinders in a confined space.
 2. Do not handle cylinders in a poorly ventilated area.
 3. Do not handle cylinders in a room with a fire hazard.
 4. Do not handle cylinders in a room with a flammable gas hazard.
 5. Do not handle cylinders in a room with a toxic gas hazard.
 6. Do not handle cylinders in a room with a corrosive gas hazard.
 7. Do not handle cylinders in a room with a radioactive gas hazard.
