PRECAUTIONARY STATEMENTS
HAZARD TO HUMANS AND DOMESTIC ANIMALS: DANGER
EXCESSILY HAZARDOUS LIQUID AND VAPOR UNDER PRESSURE.
INHALATION MAY BE FATAL OR CAUSE SERIOUS ACUTE ILLNESS OR DELAYED
LUNG OR NERVOUS SYSTEM INJURY.
DO NOT BREATH VAPORS.
LIQUID OR EXCESSIVE VAPOR CAN CAUSE SERIOUS SKIN OR EYE INJURY WHICH MAY
HAVE A DELAYED ONSET.
DO NOT GET LIQUID ON SKIN, IN EYES, OR ON CLOTHING.
THIS PRODUCT CONTAINS CHLOROPICRIN WHICH
MAY BE IRRITATING TO THE UPPER RESPIRATORY TRACT, AND EVEN AT LOW LEVELS
CAN CAUSE PAINFUL IRRITATION TO THE EYES, PRODUCING TEARIN.
IF THESE SYMPTOMS OCCUR, LEAVE THE EXPOSURE AREA IMMEDIATELY. EARLY SYMPTOMS OF CHLOROPICRIN
OVEREXPOSURE ARE LACHRYMATION, RESPIRATORY LISTNESS AND VOMITING.

OBSERVE THE FOLLOWING PRECAUTIONS

GENERAL PRECAUTIONS
1. Do not get in eyes, on skin, or on clothing.
2. Do not spill or discharge contents outside of areas confined
for treatment.
3. Comply with all local regulations and ordinances.
4. It is advisable to supply your physician with the formation on
chloropicrin and ethyl bromide. Literature is available from
your dealer or distributor.
5. Obtain medical assistance at once in case of illness after
exposure, and do not allow conditions which could potentially
expose a person before recovery is complete. (See Note to
Physician.)

RESPIRATORY PROTECTION
1. If the concentration of ethyl bromide in the working area, as
measured by a direct-reading detector device (such as a wrist
or comfortable for long periods of exposure), may not be
protected. If the concentration is exceeded at any
respirator must be available and will be required
in case of spill or leak during soil fumigation. Therefore, a SCBA or combination
air-supplied respirator must be available and will be required
for entry into an affected area in the event of a leak or spill.

CLOTHING PRECAUTIONS
1. Wear loose clothing and socks that are cleaned after each
exposure. Do not wear shoes, gloves, or any clothing
material which may become contaminated with fumigant.
2. Change clothing after exposure to contaminated clothing
and shoes. Change clothing after exposure to contaminated
material. Change contaminated clothing as soon as the
exposed person can perform heavy manual labor.
3. Do not wear gloves of any type, or rubber protective
clothing, or rubber boots.
4. If liquid fumigant splashed or spilled on clothing, remove
them at once, as soon as possible, and wash off all
inflammable source of irritation.

SPILL OR LEAK PROCEDURE
1. Evacuate the immediate area of the spill or leak. Use SCBA or
combination air-supplied/SCBA respirator for entry into the
affected area. Correct course must be taken in the event of
exposure. Do not permit entry into spill area by any person
not wearing proper protective equipment. If fumigant
contains ethyl bromide, you must wear a self-contained breathing
apparatus or approved air-supplied respirator and be
completely isolated from other sources of fumigant
exposure. Do not permit entry into spill area by
any person not wearing proper protective equipment.
2. Allow spill to evaporate. Do not permit entry into spill area
by any person not wearing proper protective equipment.
If the concentration of ethyl bromide is determined to be less than 5 p.p.m. (150 mg/m. 3)
and chloropicrin less than 0.1 p.p.m., allow spill to evaporate. Allow spill to evaporate. Do not
permit entry into spill area by any person not wearing proper protective equipment.
3. Contaminated soil, water, and other cleanup debris is a toxic
hazardous waste. Report spill to the National Response Center
(800-424-8802) if problems exceed.

RESTRICTED USE PESTICIDE
DUE TO ACUTE TOXICITY
For retail sale to and use only by Certified Applicators, or persons under their direct
supervision, and only for those uses covered by the Certified Applicator's certification.

TRI-CONE 75/25

POISON

PRECAUTIONARY STATEMENTS FOR THE USER:

IN ALL CASES OF OVEREXPOSURE, GET MEDICAL ATTENTION IMMEDIATELY.
TAKE PERSON TO A DOCTOR OR TO AN EMERGENCY TREATMENT FACILITY.

STATEMENT OF PRACTICAL TREATMENT

IF INHALED: Get exposed person to fresh air. Keep warm. Make sure person can breathe freely. If
breathing has stopped, give artificial respiration. Give oxygen if needed. Do not give anything by
mouth to any unconscious person. Seek medical attention.

IF IN SKIN: Immediately remove contaminated clothing, shoes, and other items covering the
skin. Wash contaminated skin area thoroughly with soap and water.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for at least 15 minutes.

NOTE TO PHYSICIAN: Early symptoms of overexposure are:
dizziness, headache, nausea and vomiting; restlessness, and
collapse. Lung edema may develop in 2 to 48 hours after
exposure, accompanied by cardiac irregularities; these effects are
the usual cause of death. Repeated overexposure can result in blurred vision, staggering
gait, and mental imbalance, with probable recovery after a period of no exposure. Blood
bromide levels suggest the occurrence, but not the degree, of
exposure. Treatment is symptomatic.

See Side Panel for Additional Precautionary Statements.

PRECAUTIONS FOR SOIL FUMIGATION USE

PRIORITY TO FUMIGATION

1. Comply with all local regulations and ordinances. Obtain an application permit from the local regulatory agency.

2. Never fumigate alone. It is imperative always to have an assistant present in case of accidental contact with the fumigant.

3. Drivers of application equipment must advise other workers of the fumigant's presence. Only by not instructing the crew in the mechanical operation of the equipment should the fumigation be delayed.

4. Ensure that the fumigation is done properly. Use the operator’s instructions before starting the fumigation.

5. If fumigation is done properly, the operator’s instructions are to be followed.

6. Field should then be fully sprayed with fumigant before beginning operation.

7. Two trained assistants should be present during the fumigation.

8. If fumigation is done properly, the operator’s instructions are to be followed.

DURING FUMIGATION

1. This fumigant should be applied when there is an atmospheric inversion, since uncontrolled concentrations of chlorine may drift to nearby areas immediately and cause toxic fumigation areas for a minimum of 48 hours when the application depth is 3 to 5.

2. Do not lift injection tank to the end of the pass until it is completely filled with the fumigant. The necessary supplies of water and fumigant should be available.

3. If the fumigation is not done properly, the operator’s instructions are to be followed.

4. If the fumigation is not done properly, the operator’s instructions are to be followed.

5. If the fumigation is not done properly, the operator’s instructions are to be followed.

STORAGE AND DISPOSAL

STORAGE AND HANDLING

Store in dry, cool, well-ventilated area under lock and key. Keep in a pesticide storage area. Do not store with other food, water, or feed service equipment. Keep away from fire or excessive heat. Use protective clothing. Do not apply or store fumigant in a way that results in atmospheric contamination. Store cylinders upright, secured to a rack or wall to prevent tipping. All application equipment should be subjected to regular maintenance and repair to avoid any significant failures. Use proper fumigant and water mixture to ensure the proper application of the fumigant. Follow the operator’s instructions for use of the equipment.

RETURN OF CYLINDERS

Cylinders are the property of:

1070 Highway 25
Kearney, NE 68847

SHIPPING

This fumigant is shipped in the U.S. Department of Transportation-exempted materials packaging as metal, non-membrane and more than 25% Chloropropene mixture, class "C" package (flammable liquid) and with no exceptions from the dangerous goods classification. Do not ship cylinders without safety caps or valve protection bonnets. When cylinders are returned back to the manufacturer, the cylinder is returned in a proper container. The cylinder must be returned promptly by collect goods freight. Do not ship cylinders without safety caps or valve protection bonnets. When cylinders are returned back to the manufacturer, the cylinder is returned in a proper container. The cylinder must be returned promptly by collect goods freight. Do not ship cylinders without safety caps or valve protection bonnets.

DISPOSAL

Do not dispose of fumigant in the air. Fumigant can be used as a soil amendment. Do not dispose of fumigant in landfills or incinerators. Do not dispose of fumigant in composting facilities. Do not dispose of fumigant in incinerators or landfills. Do not dispose of fumigant in composting facilities.

ENVIRONMENTAL HAZARD

This pesticide is toxic to wildlife. It is not to be used in a manner that results in atmospheric contamination. Follow all instructions and precautions for the proper use of this product.

GENERAL INSTRUCTIONS

This fumigant is a highly hazardous material and should be used only by operators trained in its proper use. Read and follow all instructions and precautions. Do not use within 1,000 feet of water or other potentially sensitive areas. This fumigant is not to be used for lawn, garden, or turf treatment. It is only for use by trained professionals. Always wear protective clothing and follow all instructions for the proper use of this product.

<td>300 - 450</td>
</tr>
</tbody>
</table>

* For production of seed only.

APPLICATION: Remove tarpaulin after 48 hours. Allow the soil to aerate for
7-14 weeks before planting. If danger of fumigant persist beyond this
4-week period, disc or plow the soil to help aeration.

FOR USE WEST OF ROCKY MOUNTAINS

ONGIONS, DIRECT SEEDED

APPLICATION: Treat area can be made whenever soil conditions are suit-
able. In northern states, late spring or early fall treat-
ments are best. For land to be planted in early spring
plant crops. Follow application directions as described above
for control of white rot, weeds (grasses) and nematodes

USE

DOSE

LIMITATION: Use restricted to west of the Rocky Mountains. Do not
plant any field more than once every twelve months.

FOR USE IN CALIFORNIA ONLY

ASPARAGUS AND LETTUCE

APPLICATION: Follow application directions as described above.
