

PTED

FORMULA 645 PENETRANT SEALER

UNDER THE FEDERAL INSECTICIDE
FUNGICIDE AND FERTILIZER ACT
FOR FERTILIZER POISON REGISTERED
TO UNITED STATES

ACTIVE INGREDIENTS: 1.0%
COPPER 8-QUINOLINOLATE
INERT INGREDIENTS: 99.0%

Directions For Use
PLEASE REFER TO TECHNICAL DATA SHEET

CAUTION:

**KEEP OUT OF REACH OF CHILDREN.
DO NOT USE, POUR, SPILL OR STORE
NEAR HEAT OR OPEN FLAME**

Do Not Allow [REDACTED] Contact With Skin. If Splashed On Skin
Wash Thoroughly With Soap And Water. Do Not Allow Material
To Be Splashed In Eyes.

If Splashed In Eyes Wash Eyes Immediately With Copious Amounts
Of Water And Secure Immediate Medical Attention.

**HARMFUL IF SWALLOWED
FOR COMMERCIAL USE ONLY**

CONTENTS
5 GALLONS 15 GALLONS
15 GALLONS 15 GALLONS

EPA REG. NO.
11265-10

Do Not Reuse Empty Container. Destroy It By Perforating Or Crushing. Bury Or
Discard In A Safe Place Away From Water Supplies.

MOLD INHIBITOR

FORMULA 645 PENETRANT SEALER

Containing copper-8-quinolinolate as the active ingredient, FORMULA # 645 PENETRANT SEALER is a ready-to-use water-repellent preservative formulated to prevent the growth of fungi on interior structural materials inside food processing plants.

FORMULA #645 PENETRANT SEALER can be brushed or sprayed onto WOOD, CONCRETE BLOCK, TILE and masonry used for walls, ceilings, floors and other structural members which support the growth of UNSANITARY mold or mildew.

FORMULA #645 FUNGICIDAL CLEAR is a PENETRANT SEALER. It is formulated to penetrate deep beneath the surface of wood and masonry in order to kill deep-seated infections of fungi and prevent their regrowth.

An antifungal Penetrant Sealer is defined as a surface coating which prevents fungal growth, impregnates the material treated, and leaves no residual film which can be removed by ordinary wear. Consequently, this product cannot peel or flake off like a paint film. As a result, FORMULA #645 has been accepted for the treatment of items such as WOOD RAIL BEAMS, and the ceiling areas above the beams.

A single treatment with FORMULA #645 will keep treated areas mold-free for periods up to several years. Copper-8-quinolinolate will not leach out of wood or concrete under normal plant operating conditions, and it is non-volatile. Treated surfaces can be washed with alkaline cleaners in order to remove dirt or other accumulations without removing the treatment. Due to the excellent mold control, washing can be reduced in a general maintenance program.

FORMULA #645 PENETRANT SEALER is sold in 55 gallon drums as a ready-to-use solution. Coverage will generally exceed 400 square feet per gallon, depending on the porosity of the treated surface.
