K-LOX S ALGAECIDE
FOR SWIMMING POOLS

GENERAL INFORMATION

K-LOX S algaecide provides effective control of algae growth in all types of swimming pools. Even though it affords long term algae control, periodic additions on a scheduled basis will assure lasting algae control. Treated water may be used immediately after addition of K-LOX S. K-LOX S is designed to prevent the growth of swimming pool algae. For heavy algal infestations, more drastic treatment such as super-chlorination may be required to eradicate the algae.

CAUTION: K-LOX S may be irritating to the skin, avoid contact with skin, eyes and clothing. In case of contact, wash thoroughly and in case of eye irritation or if swallowed, contact a doctor.

This product is toxic for fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Apply this product only as directed on this label.

Kennecott Copper Corporation warrants that this product in its unopened package conforms to the chemical description on the label and is reasonably fit for the purposes set forth on the label when used according to directions under normal use conditions as specified. THERE ARE NO OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE. This warranty does not extend to the handling or use of this product contrary to label instructions or under abnormal conditions or under conditions not reasonably foreseeable to seller and buyer assumes all risk of any such use.
