FLCAR Biological Insecticide

Sandoz, Inc.
P.O. Box 1489
Homestead, FL. 33030

You are reminded that the EPA Establishment Registration Number must appear in a suitable location on the label or on the immediate container.

Note that this submission was processed and accepted under the 1947 Federal Insecticide, Fungicide, and Rodenticide Act. At such time as re-registration is required or amendments are proposed, the Registration, Re-registration and Classification Procedures, as published in the Federal Register on July 3, 1975, will be applied. Refer to Section 162.23 of that document. Refer also to P.R. Notice 75-1 and 75-4.

BIOLOGICAL INSECTICIDE

DIRECTIONS FOR USE

Place recommended quantity of powder onto surface of water in nearly filled spray tank. Maintain agitation. Do not allow spray to stand for more than 12 hours.

Apply at first sign of egg deposition or newly hatched worms and repeat as long as egg deposition continues at 3-7 day intervals to suppress the cotton bollworm and tobacco budworm population. Thorough, even coverage is essential. Stickers may be added when anticipating heavy dews or rains. Spray tank mixture should be approximately pH 7.

Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

Sandoz, Inc.
Crop Protection
Homestead, Florida 33030
