

SOLICAM product bulletin

SOLICAM® 80WP HERBICIDE

(EPA Reg. No. 11273-19)

LABEL ADDITION

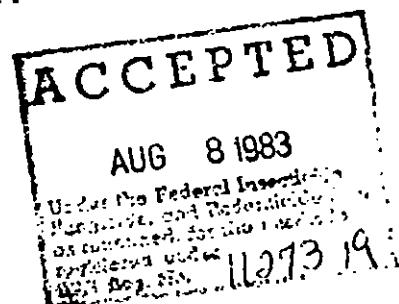

CROP	RATE	LOCATION OF USE
Grapes	2 1/2-5 lbs. per acre	California, Oregon, and Washington

In California, apply SOLICAM 80WP according to label directions from December through February. In Oregon and Washington, apply as directed from fall to early spring before weeds emerge. The soil surface must be free of weeds and relatively free of plant residues at time of application.

Vines must be established at least two years in the field. Do not use in nursery stock. Do not use in gravelly, sand or loamy sand soils.

In California, do not use in any counties south of Monterey, Kings and Tulare Counties.

Follow all other directions, restrictions, and safety precautions contained on the SOLICAM 80WP label.
