

CAUTION

14. not use in commercial food processing preparation storage and serving areas in the future all food processing surfaces equipment food and utensils should be covered during treatment or thoroughly washed before use
Remove pets birds and cover fish aquariums before spraying

PHYSICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130 °F may cause bursting.

DIRECTIONS FOR USE GENERAL CLASSIFICATION

1. The first group of authors (see Table 1) has shown that the rate of change of the concentration of the active species is proportional to the concentration of the active species, which is characteristic of a first-order reaction.

STORAGE AND DISPOSAL

1846-1847

To Kill Flies Mosquitoes Small Flying Mths and Gnats

[illegible]

To Kill Cockroaches, Ants and Crickets

1. The first step is to identify the problem. This involves understanding the current situation and the goals that need to be achieved.

2. The second step is to analyze the problem. This involves breaking down the problem into smaller, more manageable parts and identifying the causes of the problem.

3. The third step is to develop a solution. This involves brainstorming ideas and selecting the best one to implement.

4. The fourth step is to implement the solution. This involves putting the solution into action and monitoring its progress.

5. The fifth step is to evaluate the solution. This involves assessing the results of the solution and determining whether it has been successful.

To R-L Carpet Beetle

$$\begin{aligned}
\mathcal{L}(\mathbf{y}|\mathbf{X}) &= \prod_{i=1}^n \frac{1}{\sigma_i} \exp\left\{-\frac{1}{2\sigma_i^2}(\mathbf{y}_i - \mathbf{X}_i^T \boldsymbol{\beta})^2\right\} \\
&= \frac{1}{(2\pi)^{n/2}} \exp\left\{-\frac{1}{2} \mathbf{y}^T \mathbf{D}^{-1} \mathbf{y} + \mathbf{y}^T \mathbf{D}^{-1} \mathbf{X} \boldsymbol{\beta}\right\} \\
&= \frac{1}{(2\pi)^{n/2}} \exp\left\{-\frac{1}{2} \mathbf{y}^T \mathbf{D}^{-1} \mathbf{y} + \mathbf{y}^T \mathbf{D}^{-1} \mathbf{X} \boldsymbol{\beta}\right\} \\
&= \frac{1}{(2\pi)^{n/2}} \exp\left\{-\frac{1}{2} \mathbf{y}^T \mathbf{D}^{-1} \mathbf{y} + \mathbf{y}^T \mathbf{D}^{-1} \mathbf{X} \boldsymbol{\beta}\right\}
\end{aligned}$$

To a Half Dozen Forms of Confused Flour Beetles, Saw-toothed Grain Beetles and Rice Weevils

the authors have not been able to find any other studies that have examined the effects of the use of a single, non-validated, self-report measure of perceived stress. The authors have also not been able to find any other studies that have examined the effects of the use of a single, non-validated, self-report measure of perceived stress on the use of a single, non-validated, self-report measure of perceived stress.

To Kill So Many Centipedes, Firebrats and Spiders

the following: (1) the number of cells in the population, (2) the number of cells that are in the process of dividing, and (3) the number of cells that are in the process of dying. The number of cells in the population is a function of the number of cells that are in the process of dividing and the number of cells that are in the process of dying. The number of cells that are in the process of dividing is a function of the number of cells that are in the process of dividing and the number of cells that are in the process of dying. The number of cells that are in the process of dying is a function of the number of cells that are in the process of dying and the number of cells that are in the process of dividing.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling

STORAGE AND DISPOSAL

Storage Store in a cool place. Activity may be impaired by storage at temperatures above 90° F. Protect from freezing.

Disposal Do not reuse empty container. Destroy or discard in a safe place. Do not contaminate water by cleaning of equipment or disposal of wastes.

GENERAL Apply at first sign of infestation when worms are small and repeat at weekly intervals as needed to maintain control. THURICIDE 32B attacks the larval gut and must be eaten by the insect to be effective. Thorough underleaf coverage is, therefore, essential for best results. After eating THURICIDE 32B, worms stop feeding and die within 2-3 days. Since the active ingredient, *Bacillus thuringiensis*, is exempt from tolerance requirements, THURICIDE 32B may be applied up to the day of harvest.

MIXING Always shake or stir THURICIDE 32B thoroughly before use. Pour recommended amount of THURICIDE 32B onto surface of water in a nearly filled spray tank. Maintain agitation. Use the higher rates against very heavy worm infestations, or where it is difficult to get good coverage due to rank foliage. Do not allow dilute sprays to stand in the tank for more than 12 hours. Combinations with chemical insecticides, fungicides, spreader-stickers, and stickers in the tank are generally not deleterious to THURICIDE 32B if the mix is used promptly.

GROUND APPLICATION Use recommended amount of THURICIDE 32B in a minimum of 5 to 50 gallons of water, depending on the type of crop and requirements of state regulations. Add a sticker, adhesive or deposit builder where heavy dew or rain is encountered.

GROUND APPLICATION TREES Use recommended amount of THURICIDE 32B in 100 gallons of water in high pressure, high gallonage hydraulic sprayers. Wet foliage thoroughly with spray but not to the point of excessive runoff. For mist blowers use recommended amount in 10 gallons of water. To prevent washoff by rain add a sticker to the finished spray.

AERIAL APPLICATION Use recommended amount of THURICIDE 32B in 5 to 20 gallons of water. A sticker should be added under conditions of heavy dew or rain. Apply early morning or evening when the air is calm.
