DRY CONCENTRATE POOL CHLORINE

DIRECTIONS: For initial treatment, condition the pool with 4 lbs. Cyanuric Acid or pool conditioner. Add 1 lb. EVRPURE Dry Concentrate Pool Chlorine for a minimum of 1.0 ppm chlorine and continue every day, or as needed, per 20,000 gallons of pool water. A standard measuring cup contains 8 oz. to maintain chlorine 1.0 to 2.0 ppm. Test pool water frequently with a chlorine test kit, and repeat dose as needed to maintain 1.0 to 2.0 residual chlorine. For pool water temperature above 70° super-chlorination with EVRPURE liquid Pool Chlorine according to label directions is recommended weekly. Controls the growth of algae and many bacteria.

IMPORTANT: Pool water should be maintained between a pH of 7.2 and 7.6 as determined by a test kit.

DANGER: May be harmful or fatal if swallowed. Causes eye damage and skin irritation. May cause burns on moist or broken skin. Do not get in eyes, on skin, or on clothing. Avoid inhalation of dust. Moisture contamination may liberate irritative and hazardous chlorine gas. Avoid contamination of food and feed stuffs. Store in a cool, dry, well-ventilated area.

ENVIRONMENTAL PRECAUTIONS: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not enter water by means of equipment, or discharge wastes. Apply this product only as specified on the label.

OXIDIZING MATERIAL: Do not mix with other chemicals. Contact with organic matter, or any foreign matter, may cause fire. Burns will produce severe eye injury. Irritates.

FIRST AID: If swallowed, give several glasses of water or milk. Wash mouth with water. If on skin, flush with water. Get medical attention if on skin, flush with water. Call a doctor immediately.

ESTIMATING POOL CAPACITY

Surface Area Method: Surface area in sq. ft. x average depth in ft. = Total Gallons

Shape Method:

Rectangular: Average length x average width x average depth in ft. x 7.5 = Total Gallons

Circular: 3.14 x diameter x diameter x average depth in ft. x 7.5 = Total Gallons

Oval: 1.1 x diameter x short diameter x average depth in ft. x 7.5 = Total Gallons

Total gallons divided by 7.5 = pounds of chlorine required.

POOL CARE GUIDE

Pool Capacity	Pool Type	EVRPURE Dry Concentrate Pool Chlorine
10,000	Swimming Pool	1 lb.
15,000	Swimming Pool	1.5 lb.
20,000	Swimming Pool	2 lb.
25,000	Swimming Pool	2.5 lb.
30,000	Swimming Pool	3 lb.
35,000	Swimming Pool	3.5 lb.
40,000	Swimming Pool	4 lb.
45,000	Swimming Pool	4.5 lb.
50,000	Swimming Pool	5 lb.
55,000	Swimming Pool	5.5 lb.
60,000	Swimming Pool	6 lb.
65,000	Swimming Pool	6.5 lb.
70,000	Swimming Pool	7 lb.
75,000	Swimming Pool	7.5 lb.
80,000	Swimming Pool	8 lb.
85,000	Swimming Pool	8.5 lb.
90,000	Swimming Pool	9 lb.
95,000	Swimming Pool	9.5 lb.
100,000	Swimming Pool	10 lb.
10,000	Hot Tub	0.5 lb.
15,000	Hot Tub	0.75 lb.
20,000	Hot Tub	1 lb.

DRY CONCENTRATE POOL CHLORINE

DIRECTIONS: For initial treatment, condition the pool with 4 lbs. Cyanuric Acid or pool conditioner. Add 4 ozs. EVRPURE Dry Concentrate Pool Chlorine to a minimum of 1.0 ppm chlorine and continue every day, or as needed, per 20,000 gallons of pool water (a standard measuring cup contains 8 ozs.) to maintain chlorine 1.0 to 2.0 ppm. Test pool water frequently with a chlorine test kit, and repeat dose as needed to maintain 1.0 to 2.0 residual chlorine. For pool water temperature above 70° super chlorination with EVRPURE Liquid Pool Chlorine according to label directions is recommended weekly. Controls the growth of algae and many bacteria.

IMPORTANT: Pool water should be maintained between a pH of 7.2 and 7.6 as determined by a test kit.

DANGER: May be harmful or fatal if swallowed. Causes eye damage and skin irritation. May cause burns on moist or broken skin. Do not get in eyes, on skin, or on clothing. Avoid inhalation of dust. Moisture contamination may liberate irritating and hazardous chlorine containing gases. Avoid contamination of food and feedstuffs. Store in a cool, dry, well-ventilated area.

ENVIRONMENTAL PRECAUTIONS: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

OXIDIZING MATERIAL: Do not mix with other chemicals. Contact with organic matter or any foreign material may cause fire. Burning will produce chlorine or equally toxic gases.

FIRST AID: If swallowed, give several glasses of milk or water, followed by olive oil or cooking oil. For contact with eyes or skin, flood with water. Call a doctor immediately.

ESTIMATING POOL CAPACITY

Surface Area Method: Surface area × average depth (in ft.) × 7.5 Total Gallons.

Shape Method: *

Rectangular: Average length × average width × average depth (in ft.) × 7.5 Total Gallons.

Circular: Diameter × diameter × average depth (in ft.) × 5.9 Total Gallons.

Oval: Long diameter × short diameter × average depth (in ft.) × 5.9 Total Gallons.

*If pool has sloping sides, multiply total gallons by 0.85.

POOL CARE GUIDE

Pool Capacity Gallons	Pool Conditioner (Just Once)	EVRPURE Dry Concentrate Pool Chlorine every other day or as needed
5,000	1 lb.	1 Oz.
10,000	2 lbs.	2 Ozs.
15,000	3 lbs.	3 Ozs.
20,000	4 lbs.	4 Ozs.
25,000	5 lbs.	5 Ozs.
30,000	6 lbs.	6 Ozs.
35,000	7 lbs.	7 Ozs.
40,000	8 lbs.	8 Ozs.

Rinse empty container thoroughly with water and discard. Do not burn.
