DRY POOL CHLORINE CARTRIDGE FOR 24 HOUR SANITATION AND ALGAE CONTROL

EVRPURE DRY POOL CHLORINE CAR-TRIDGE floats in the pool; it automatically feeds stabilized chlorine for continuous disinfection and algae control.

DIRECTIONS

Before using this product, read all directions carefully, then remove label and save.

CONDITIONING. For initial treatment of pool water use 4 pounds of Cyanuric Acid or pool conditioner for every 20.000 gallons of water. To establish the chlorine residual of 1.0 to 1.5-ppm, add Evrpure Liquid Pool Chlorine according to label directions. Thereafter, an Evrpure Dry Pool Chlorine Cartridge should maintain proper stabilization. CARTRIDGE USE: Fit threaded end of cartridge into top of float and screw down until desired feed rate number on the cartridge side is even with top of float.

CHLORINATION: Set the cartridge feeder as shown in the table to maintain a chlorine residual of 1.0 to 1.5 ppm. Use a chlorine test kit to test pool water frequently. To maintain the desired chlorine residual at all times, the feed setting may have to be increased especially when the bathing load is heavy or the weather hot.

AFTER USE: Rinse container thoroughly with water and discard it. Do not burn.

IMPORTANT Pool water should be maintained between a ph of 7.2 and 7.6 as determined by a test kit. The EVRPURE DRY POOL CHLORINE CARTRIDGE adds acid to the pool in addition to chlorine. Check ph frequently with test kit. If ph is below 7.2, add soda ash following the directions on the product label.

DANGER: CORROSIVE. Causes eye damage. May cause skin burns on moist or broken skin. Do not get in eyes, on skin or on clothing Avoid inhalation of dust. May be harmful or fatal if swallowed. Avoid contamination of food and feed-stuffs.

STRONG OXIDIZING MATERIAL: Do not mix with other chemicals. Contact with organic matter may cause fire or explosive decomposition. Burning or moisture contamination may liberate irritating and hazardous chlorine-containing gases. Store in a cool. dry. well-ventilated area.

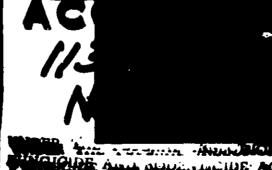

ENVIRONMENTAL PRECAUTIONS: This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

FIRST AID: If swallowed, give several glasses of milk or water, followed by olive oil or cooking oil. For contact with eyes or skin, flood with water for at least 15-min-

utes. Call a doctor immediately.
