**DRY POOL CHLORINE CARTRIDGE FOR 24 HOUR SANITATION AND ALGAE CONTROL**

**DIRECTIONS**

1. Remove the cap from the cartridge and place the cartridge in the pool. The cartridge will release chlorine into the pool water, providing 24-hour sanitation and algae control.

2. The cartridge should be replaced every 30 days. To replace the cartridge, simply lift it out of the pool and discard it. Then insert a new cartridge into the pool.

3. The cartridge is designed to fit into the standard pool chlorine cartridge holder. It is easy to install and remove.

4. The cartridge is made of a special material that allows chlorine to be released slowly and evenly into the pool water. This provides a constant level of chlorine, keeping the pool water clean and clear.

5. The cartridge is also designed to prevent algae from growing in the pool. This helps to keep the pool looking beautiful and healthy.

6. The cartridge is a convenient and effective way to keep your pool water clean and clear. It is the perfect solution for pool owners who want to save time and money on pool maintenance.
