

APPLICATION

POLI-QUAT is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers. Prior to its use, systems must be cleaned to remove algal growth, microbiological slime and other deposits. An initial slug addition of 2.9 to 7.3 fluid ounces of POLI-QUAT per 1000 gallons of water to provide a concentration of 24 to 60 parts per million of POLI-QUAT based on the total weight of water in the system is recommended. Repeat initial dosage until control is evident. Subsequent slug additions of 0.73 to 7.3 fluid ounces of POLI-QUAT per 1000 gallons of water (6 to 60 parts per million of POLI-QUAT) should be employed every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

CHEMCO POLY-QUAT

ACTIVE INGREDIENT:

Poly (oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride) 20.0%

INERT INGREDIENT 80.0%

100.0%

Weight per gallon 8.69 pounds

Weight of active ingredient per gallon .1.74 pound

NET CONTENTS: _____ EPA Reg. No. 11327-5

CAUTION:

Keep out of Reach of Children. See right side panel for additional precautionary and first aid statements.

INDUSTRIES INCORPORATED

Manufacturing Chemists
