

WILL NOT DAMAGE TREES and SHRUBS
when used as directed.

Watson-Rooter Root Killer is a powerful chemical concentrate that destroys roots. This action will not result in damage to trees and shrubs nor ornamental plants.

DO NOT... put Root Killer in sinks, tubs or metal containers or allow it to come in contact with chrome fixtures. It will not correct stoppages created by broken or damaged pipe or defective installations.

CAUTION

HARMFUL IF SWALLOWED

If swallowed:

1. Induce vomiting by giving two spoonfuls of strong solution of soapsuds or sodium bicarbonate in a glass of water.
2. Drink one pint of milk or whites of two or more eggs.
3. Call your doctor.

KEEP LID ON TIGHTLY. KEEP OUT OF REACH OF CHILDREN

lbs.

Contents: Net Weight

Active Ingredients:
Copper Sulfate Pentahydrate by weight 95.0%
(As elemental copper — 24.13%)
Inert Ingredients:
Sodium Sulfate 3.0%
Methyl Naphthalene Sodium Sulfonate 2.0%
CAUTION: KEEP OUT OF REACH OF CHILDREN 100.0%

CAUTION

HIGHLY TOXIC IF TAKEN INTERNALLY
Read information at left for complete precautions.

DIRECTIONS FOR USE

Plan to use Root Killer at night when plumbing is at a minimum use. Excessive water flow can reduce chemical action.

Select toilet bowl nearest to drain that connects to street sewer. Pour about two cups of contents into toilet bowl and flush as often as required to get all contents washed down. Repeat this procedure 3 more times. After last portion is used... flush bowl twice more.

Where serious root stoppage has existed for a period of time, it may be necessary to apply 2 or 3 additional treatments within the next 10 days. Use Root Killer each month thereafter to maintain free flow. Watson-Rooter Root Killer will prevent stoppage caused by penetrating roots into sewer joints if used twice a year.

WHERE STOPPAGE IS COMPLETE... It is necessary to puncture obstructing mass with a rod to allow sufficient flow so Root Killer can make contact with roots.

FOR SEPTIC TANK DRAINAGE FIELDS... Simply pour contents of can into the distribution box OUTSIDE septic tank. DO NOT POUR INTO TANK.

DO NOT REUSE EMPTY CONTAINERS. Destroy by incinerating or crushing. Bury or discard in safe place.
