

SWIMMING POOL CHEMICALS

# Algaecide NF

**ACTIVE INGREDIENT**

Poly(oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride) 40.0

**INERT INGREDIENT** 60.0

This product contains 3.6 lb. of active ingredient per gallon and weighs 12 lb. per gallon.

**KEEP OUT OF REACH OF CHILDREN  
CAUTION**

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION** Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes or clothing.

**FIRST AID** If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

**ENVIRONMENTAL HAZARDS** This pesticide is toxic to fish. Keep out of lakes, streams or ponds. Permits may be required for discharges containing this pesticide into lakes, streams, ponds or public water. For guidance, contact the regional office of the Environmental Protection Agency.

**NET CONTENTS: 32 FL. OZ. (1 QT.)**

Classification: Federal law restricts this pesticide to use only in the manner prescribed on its labeling.

ALGAECIDE NF is used to control the growth of algae in swimming pools. For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to using ALGAECIDE NF.

For pools having just visible algae growth, add an initial dose of 18 to 27 fluid ounces of ALGAECIDE NF per 10,000 gallons of water and remove settled algae debris by cleaning.

For treatment of a freshly cleaned and filled pool, add initially 10 to 18 fluid ounces of ALGAECIDE NF per 10,000 gallons of water.

To maintain pools free of visible algae growth, subsequent additions of 3.5 to 7 fluid ounces of ALGAECIDE NF per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment.

ALGAECIDE NF is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. ALGAECIDE NF can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGAECIDE NF with concentrated dry or liquid chlorine products.

**STORAGE & DISPOSAL:** Keep container closed when not in use. Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not reuse empty container. Triple rinse (or equivalent) and dispose of container in an incinerator or in an approved landfill or bury in a safe place. Rinse that cannot be used or reprocessed should be disposed of in a landfill approved for pesticides or buried in a safe place away from water supplies. Open dumping is prohibited.

**HOW TO CALCULATE THE NUMBER OF GALLONS IN YOUR POOL**

Measure length, width and average depth in feet. For square or rectangular pools:

$$\text{Gallons} = \text{length} \times \text{width} \times \text{depth} \times 7.5$$

For circular or elliptical pools:

$$\text{Gallons} = \text{length} \times \text{width} \times \text{depth} \times 5.9$$

**NOTICE:** Buyer assumes all risks of use, storage or handling of this material, not in strict accordance with the directions given herewith.
