

INSTRUCTIONS: When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 ppm to 2.0 ppm available chlorine. To accomplish this, add 2 oz. LESLIE'S CHLOR BRITE II per 1,000 gallons of pool water. It is necessary to condition pool water with LESLIE'S CONDITIONER according to directions on box. Maintain conditioner level between 25 to 50 ppm for optimal results.

LESLIE'S CHLOR BRITE II should be added daily or as needed at the rate of 1/4 to 1/2 oz. per 1,000 gallons of pool water (1 1/2 to 3 teaspoonfuls) to maintain a chlorine residual at all times of 1.0 ppm to 2.0 ppm as determined by a suitable test kit. The pH should be maintained between 7.2 and 7.6.

A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. For the shock treatment, add 2 oz. of LESLIE'S CHLOR BRITE II per 1,000 gallons of pool water. Swimmers should not be permitted in the pool after the shock treatment until the chlorine residual is below 2.0 ppm.

Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads. These require additional dosage to maintain the chlorine residual between 1.0 ppm and 2.0 ppm, as determined by a suitable test kit.

DANGER: KEEP OUT OF REACH OF CHILDREN

CORROSIVE: Produces severe chemical burns to the eyes, skin or mucous membranes. Do not get in eyes, on skin or clothing. Do not breathe dust. May be fatal if swallowed. Avoid contamination of food. Wash hands after handling. See full safety warnings precautions on side panel.

KEEP COVER CLOSED WHEN NOT IN USE.

ACTIVE INGREDIENT:
Sodium Dichloro-s-Triazinetrione
Dihydrate 100%
(56% available chlorine)

55

NET WT. 5.5 LBS.

DANGER: KEEP OUT OF REACH OF CHILDREN. Causes eye and skin irritation. Do not breathe dust. May cause throat irritation. May cause burns.

FIRST AID: In case of excess material and flu, water for at least 15 minutes. Call attention. Clean container. If swallowed, see followed by olive oil or cran immediately.

DANGER: Strong oxidization may liberate chlorine-containing gas. If decomposition, if it is in open air, it will vent. Release of water if needed. Do not mix with other dry clean measuring device. Keep closed when use container. Rinse with water and discard.

ENVIRONMENTAL HAZARD: Toxic to fish. Treated in scheduled where it is used in public water. Do not use in equipment.
