Laird's Regulatory Consultants
501 South Lincoln Avenue
Sterling, VA. 20164

Attention: Olivia Laird
Consultant for Leslie's Pool Brite

Subject: Chlorinator Tablets - 1"
EPA Registration Number 11411-3
Your Amendment Dated March 9, 1998

The revised Confidential Statement of Formula dated March 9, 1998 is in compliance with PR Notice 91-2, it agrees with the label and is acceptable.

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable provided you make the labeling change listed below you release the product for shipment bearing the amended labeling.

When the percentage is less than one, the decimal point should be preceded by a zero. In the "Ingredient Statement" revise the ".6%" to read "0.6%".

A stamped copy is enclosed for your records. Submit one copy of the final printed label before you release the product for shipment bearing the amended label.

If you have any questions concerning this letter, please contact Delores Williams at (703) 308-6372.

Sincerely,

Robert S. Brennis
Product Manager (32)
Regulatory Management Branch II
Antimicrobials Division (7510W)

LESLIE'S™

CHLORINATOR TABLETS — 1"

OXIDIZER UN2468

Stabilized Chlorinating Tablets for Swimming Pools

- Slow Dissolving
- Protected from Sunlight
- Controls Bacteria & Algae
- Completely Soluble

Active Ingredient:

Trichloro-s-triazinetrione . . . 99.4%
 Inert Ingredients6%
 Total 100.0%
 (Available Chlorine — 90%)

EPA Reg. No. 11411-3
 EPA Est. No. 65723-MX-1
 NET WEIGHT 25 Lbs. (400 Oz.) (11.34 Kg.)

Keep Out of Reach of Children
DANGER

STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN

DANGER: CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breath dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Keep product dry in tightly closed container when not in use. Store in cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container if possible and flood with large amounts of water to dissolve all material before discarding. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label directions, contact your State Pesticide or environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. Do not reuse container. Triple rinse or equivalent. Then offer for recycling or reconditioning, or puncture and dispose of in sanitary landfill or by methods approved by State and local authorities.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DIRECTIONS

Automatic In-line Chlorinators & Floating Dispensers: Add Leslie's Chlorinator Tablets - 1" according to the directions on your chlorinator.

Cartridge Chlorinators: Remove top of cartridge, refill with Leslie's Chlorinator Tablets - 1" and follow directions on cartridge. **Important:** Allow empty cartridge to dry before refilling.

DO NOT ADD TABLETS DIRECTLY INTO THE POOL OR THE POOL SKIMMER AS DAMAGE WILL OCCUR.

Startup:

1. Adjust pH to 7.2 to 7.6
2. Superchlorinate with Leslie's Power Powder or Leslie's Chlor Brite III to obtain a 1-1.5 ppm chlorine residual. Follow label directions.
3. The next day, stabilize your pool using Leslie's Conditioner. Follow label directions.

Routine Care:

The amount of Leslie's Chlorinator Tablets - 1" to be added will vary with individual pool conditions such as water temperature, sunlight, organic contaminants and bather load.

Maintain a chlorine residual of 1-1.5 ppm at all times. If chlorine residual fails to hold during periods of heavy use, increase feed rate or superchlorinate with Leslie's Power Powder. Maintain pH 7.2 to 7.6, Total Alkalinity 80-120 ppm for plaster pools, Total Alkalinity 100-140 ppm for vinyl-liner pools, calcium hardness 200 ppm minimum. Test with a reliable test kit such as Leslie's Deluxe Test Kit. Make necessary adjustments with appropriate Leslie's pool care products. Superchlorinate at least once per week during periods of heavy usage or when water temperatures are above 80°F and once every two weeks in residential pools receiving normal usage. This will burn out organic material and keep water sparkling clear. Reentry into treated swimming pool/spas is prohibited above levels of 3 ppm of chlorine.
