**SIZING CHART — Pools (7'-8' Deep)**

Pool Size	Gallons	Holes Req'd Per Side	Day
11' x 22'	10,000	2	1½
14' x 28'	15,000	3	2
18' x 32'	20,000	4	2½
17' x 34'	25,000	5	2½
18' x 38'	30,000	6	3
20' x 40'	35,000	7	3½
22' x 44'	40,000	8	4

**REMOVE AND SAVE THIS LABEL  
FOR FUTURE REFERENCE  
BEFORE PLACING IN POOL**

**DIRECTIONS — READ BEFORE USING CHLORINATOR**

**DIRECTIONS FOR USE:**

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Determine pool gallonage from sizing chart. Leslie's Floating Chlorinator is marked 10,000 for a 10,000-gallon pool, up to 40,000 for a 40,000-gallon pool. These are approximate markings only and are to be used for reference. Every pool requires different amounts of chlorine to maintain a proper balance. Use a sharp knife and cut the blisters off at the point closest to your pool gallonage, down near the end where the cap is located. Cut the same number of holes on the opposite side. Place the small end of the chlorinator in the pool first. The large end will entrap air and allow air to float on the pool surface (do not remove cap). Check chlorine residual daily until the proper chlorine level of 1.0 to 1.5 parts per million is maintained. If residual is not high enough, cut off one additional blister until residual is stable at 1.0 to 1.5 ppm. If the residual is too high, cover one set of holes with a strip of plastic electrical tape. Refill chlorinator when the tablets have been used up or are insufficient to maintain proper residual. When desirable, Leslie's Floating Chlorinator may be removed from pool. Allow all water to drain from container and set large end on pool deck or flat surface.

**TO REFILL:** Remove cap of chlorinator and refill with Leslie's Chlorinator Tablets.

**IMPORTANT:** Keep the pH of the water between 7.2 to 7.8. Leslie's Chlorinator Tablets decrease chlorine and acid, so tend to lower pH. If you normally do not need acid for pH regulation, you must add 1 lb. of soda ash to water each time a fresh 4 lbs. of tablets is added. If chlorine residual fails to hold during periods of heavy use, increase tablet rate and/or superchlorinate. If tablets or dry chlorine have not been used before or if the pool has been freshly filled, it is necessary to condition pool water. When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 to 1.5 ppm available chlorine.

**STORAGE AND DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in a cool dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area, or bury in a safe place.

**PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

**PRACTICAL TREATMENT:** (First Aid): If swallowed, feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance, contact the regional office of EPA.

**PHYSICAL AND CHEMICAL HAZARDS**

**STRONG OXIDIZER ALERT:** Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contact with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

## DIRECTIONS — READ BEFORE USING

**DIRECTIONS FOR USE:**  
It is a violation of Federal law to use this product in a manner not intended. Determine pool gallonage from sizing chart. Leslie's Floating Chlorinator, on up to 40,000 for a 40,000-gallon pool. These are approximate. Every pool requires different amounts of chlorine to maintain. Cut the blisters off at the point closest to your pool gallonage. Cut the same number of holes on the opposite side. Place the small end of the unit in the pool and allow unit to float on the pool surface. Cut off one additional blister until residual is stable at 1.0 to 1.5 ppm of holes with a strip of plastic electrical tape. Refill chlorinator if insufficient to maintain proper residual. When desirable, Leslie's Chlorinator may be used in conjunction with other chlorine products. Allow all water to drain from container and set large end on top. **TO REFILL:** Remove cap of chlorinator and refill with Leslie's Chlorinator.

**IMPORTANT:** Keep the pH of the water between 7.2 to 7.8. Low pH and acid, so tend to lower pH. If you normally do not need acid, add acid to water each time a fresh 4 lbs. of tablets is added. If chlorine use, increase feed rate and/or superchlorinate. If tablets or dry chlorine has been freshly filled, it is necessary to conduct a pool water test to satisfy chlorine demand and to establish a chlorine residual.

**STORAGE AND DISPOSAL:** Keep product dry in tightly closed container in well-ventilated area away from heat or open flame. In case of fire, and flood with large amounts of water to dissolve all material before disposal in approved landfill area, or bury in a safe place.

**PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**  
**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if inhaled. Wear goggles or face shield and rubber gloves. Avoid breathing dust. Remove and wash contaminated clothing.

**PRACTICAL TREATMENT: (First Aid):** If swallowed, feed bread or milk. Call a physician immediately. If on skin, brush off excess and wash with soap and water for at least 15 minutes. If irritation persists, get medical attention. Get medical attention.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not use in public waters unless in accordance with an NPDES Permit. For more information, contact your local health department.

**PHYSICAL AND CHEMICAL HAZARDS:**  
**STRONG OXIDIZING AGENT:** Mix only with water. Use clean dispensing device containing remnants of any other product. Subject to fire or explosion. Contamination with moisture, organic matter, or reaction with generation of heat, liberation of hazardous gases, or in case of contamination or decomposition, do not reuse container or well-ventilated area. Flood with large volumes of water, if necessary.
