FILE COPY

Subject: Leslie's Swimming Pool Supplies
Floating Chlorinator
EPA Registration No. 11411-5
Submission Dated: May 29, 2009
Receipt Date: June 6, 2009

Dear Mr. Jennings:

The labeling for the product referred to above submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended (FIFRA) is acceptable with the comments/conditions listed below.

Conditions:

1. The word "Consistent" has been removed from the marketing claims. This is an implied residual claim which cannot be substantiated.

2. The Antimicrobials Division has revisited the subject of Category I placement of the First Aid statement on the label and decided that the "First Aid" section of this label must be moved to the front panel.

3. Revise the "Hazards to Humans and Domestic Animals" statement as follows:

DANGER. Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles, and rubber gloves when handling this product. For skin protection, wear long sleeves and long pants. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

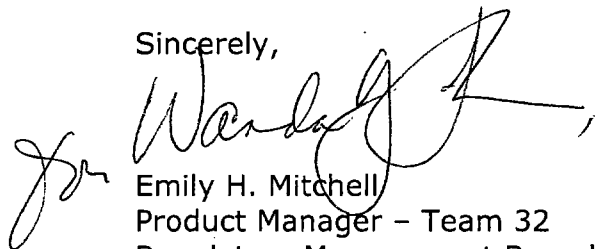

4. The routes of exposure must appear on the label by their acute toxicity categories from 1-4. They must appear in the following order: If in eyes, If on skin or clothing, If inhaled and If swallowed.

General Comments:

A stamped copy of the labeling accepted with conditions is enclosed. Submit one copy of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please contact Wanda Henson at (703) 308-6345.

Sincerely,

A handwritten signature in black ink, appearing to read 'Emily H. Mitchell', written over a printed name.

FIRST AID	
If in eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
If swallowed	<ul style="list-style-type: none"> • Call poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
If inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.
If on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
<p>Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), call the National Pesticide Telecommunications Network at 1-800-858-7378.</p>	
NOTE TO PHYSICIAN	Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles and rubber gloves when handling this product. For skin protection, wear long sleeves and long pants. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

{Environmental Hazard statement for end-use products in containers of less than 50 pounds (solid, dry weight)}

ENVIRONMENTAL HAZARD: This pesticide is toxic to fish and aquatic organisms.

{Environmental Hazard statement for end-use products in containers equal to or greater than 50 pounds (solid, dry weight)}

ENVIRONMENTAL HAZARD: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

Do not allow product to become wet or damp before use. Never add water to product. Always add product to large amount of water. Do not remove this device from water for more than five minutes if it contains a tablet or tablet residue. Do not mix with other chemicals. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire or explosion. Strong oxidizing agent. Keep this product away from heat, flame and burning material, such as a lighted cigarette.

In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area and flood with large amounts of water. Dispose of any remaining product in accordance with all local, state and or federal regulations. Do not place product in trash.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE

DO NOT ATTEMPT TO OPEN OR REFILL THIS CARTRIDGE. DO NOT COMPLETELY SUBMERGE CARTRIDGE. DO NOT MIX WITH OTHER PRODUCTS, PRE-MIX OR DISSOLVE BEFORE USE. ADD PRE-FILLED CARTRIDGE DIRECTLY TO POOL ACCORDING TO DIRECTIONS BELOW. DO NOT ALLOW HANDLING OF CARTRIDGE BY CHILDREN.

1. Adjust pH to 7.2-7.8, Total Alkalinity to 80-120 ppm and Calcium Hardness to 200 ppm minimum. 2. Superchlorinate with Leslie's Swimming Pool Supplies Power Powder Plus, Power Powder Pro or Chlor Brite (or) [preferred shock product] to obtain a Free Available Chlorine (FAC) level of 1-4 PPM. Follow use directions and precautionary statements on those product labels. 3. If pool water is unstabilized, stabilize the pool water using Leslie's Swimming Pool Supplies Conditioner (or) [preferred stabilizer product]. Follow label directions and precautionary statements. 4. This floating cartridge is marked in gallon increments ranging between 10,000 and 40,000 gallons. To use the cartridge, carefully punch out all feeder holes on both sides of the cartridge up to and including the ones corresponding to your pool's size as measured in gallons of water. If pool is between sizes marked on cartridge, punch out next holes up to next higher increment. Make sure holes are punched out sufficiently to allow the free flow of water through cartridge. 5. Carefully place cartridge in pool water, neck side down. 6. Maintain Free Available Chlorine level between 1-4 PPM. If chlorine is too low, punch out an additional hole on each side of the cartridge. If chlorine is too high, seal one hole on each side of the cartridge with waterproof plastic tape. 7. Leave floating cartridge in pool until product inside is thoroughly dissolved. Do not dispose of cartridge containing undissolved product. Doing so could result in product contamination leading to fire or explosion. Be aware that water coming out of cartridge containing product can bleach clothing or other surfaces. 8. The cartridge will float on its side to signal the need for replacement. Do not attempt to open or refill the cartridge.

The amount of chlorine needed on a routine basis will vary with individual pool conditions such as bather load, water temperature, organic contaminants and other variables. Maintain a Free Available Chlorine (FAC) level of 1-4 PPM at all times. It may be necessary to increase the chlorinator feed rate or superchlorinate during heavy periods of use to maintain the desired FAC level. Maintain pH between 7.2-7.8, Total Alkalinity between 80-120 ppm and Calcium Hardness at 200 PPM minimum. Test pool water regularly using a reliable test kit and make the necessary adjustments using the appropriate Leslie's pool care product. To remove excessive organic materials and to keep the water sparkling clear, superchlorinate weekly with Leslie's Swimming Pool Supplies Power Powder Plus, Power Powder Pro or Chlor Brite when water temperatures are above 80°F. Follow use directions on those product labels. You may only need to superchlorinate every other week when water temperatures are below 80°F. Reentry into treated swimming pools is prohibited above levels of 4 PPM of chlorine due to risk of body injury.

9/5

STORAGE AND DISPOSAL:

STORAGE: Do not contaminate water, food, or feed by storage or disposal. Keep product dry in its tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children **Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available.
