OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

January 21, 2015

Mr. Mike Jennings
Director, Safety & Regulatory Affairs
Leslie's Poolmart, Inc.
LPM Manufacturing, Inc.
2005 East Indian School Road
Phoenix, AZ 85016

Subject: Label Amendment – Minor Label Changes
Product Name: **Leslie's Swimming Pool Supplies Floating Chlorinator**
EPA Registration Number: **11411-5**
Application Date: November 19, 2014
Decision Number: 498778

Dear Mr. Jennings:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Page 2 of 2
EPA Reg. No. 11411-5
Decision No. 498778

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Killian Swift by phone at 703-308-6346, or via email at Swift.Killian@epa.gov.

Sincerely,

A handwritten signature in blue ink that reads "Wanda J. Fuller, for". The signature is written in a cursive, flowing style.

Precautions on [Back][Side] Panel

ACTIVE INGREDIENT:

Trichloro-s-triazinetrione.....99%

OTHER INGREDIENTS.....1%

Total.....100%

.....Available Chlorine – 90%

NET WT. 4 Lbs. (1.81 kg)

{Back/Side Panel}

FIRST AID	
If in Eyes	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a poison control center or doctor for treatment advice.
If on Skin or Clothing	<ul style="list-style-type: none">• Take off contaminated clothing.• Rinse skin immediately with plenty of water for 15-20 minutes.• Call a poison control center or doctor for treatment advice.
If Inhaled	<ul style="list-style-type: none">• Move person to fresh air.• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.• Call a poison control center or doctor for further treatment advice.
If Swallowed	<ul style="list-style-type: none">• Call a poison control center or doctor immediately for treatment advice.• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to do so by a poison control center or doctor.• Do not give anything by mouth to an unconscious person.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For medical emergencies, call the Poison Control Center at 1-800-222-1222.	
NOTE TO PHYSICIAN	Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

HAZARD[S] TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles and rubber gloves when handling this product. For skin protection, wear long sleeves and long pants. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

{Environmental Hazard statement for end-use products in containers of less than 50 pounds (solid, dry weight)}

ENVIRONMENTAL HAZARD[S]: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARD[S]

Do not allow product to become wet or damp before use. **Never add water to product.** Always add product to large amount of water. Do not remove this device from water for more than five minutes if it contains a tablet or tablet residue. Do not mix with other chemicals. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire or explosion. Strong oxidizing agent. Keep this product away from heat, flame and burning material, such as a lighted cigarette.

In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area and flood with large amounts of water. Dispose of any remaining product in accordance with all local, state and federal regulations. Do not place product in trash.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

[READ ALL PRECAUTIONARY STATEMENTS BEFORE USE]

DO NOT ATTEMPT TO OPEN OR REFILL THIS CARTRIDGE. DO NOT COMPLETELY SUBMERGE CARTRIDGE. DO NOT MIX WITH OTHER PRODUCTS, PRE-MIX OR DISSOLVE BEFORE USE. ADD PRE-FILLED CARTRIDGE DIRECTLY TO POOL ACCORDING TO DIRECTIONS BELOW. DO NOT ALLOW HANDLING OF CARTRIDGE BY CHILDREN.

1. Adjust the pH to 7.2-7.8 , Total Alkalinity to 80-120 ppm and Calcium Hardness to 200 ppm minimum. **2.** Superchlorinate with **[an EPA registered sanitizer][brand name(s)]** to obtain a Free Available Chlorine (FAC) level of 1-4 ppm. Follow use directions and precautionary statements on those product labels. **3.** If pool water is unstabilized, stabilize the pool water using **[a stabilizer][brand name(s)]** . Follow label directions and precautionary statements. **4.** This floating cartridge is marked in gallon increments ranging between 10,000 and 40,000 gallons. To use the cartridge, carefully punch out all feeder holes on both sides of the cartridge up to and including the ones corresponding to your pool's size as measured in gallons of water. If pool is between sizes marked on cartridge, punch out next holes up to next higher increment. Make sure holes are punched out sufficiently to allow the free flow of water through cartridge. **5.** Carefully place cartridge in pool water, neck side down. **6.** Maintain Free Available Chlorine level between 1-4 ppm. If chlorine is too low, punch out an additional hole on each side of the cartridge. If chlorine is too high, seal one hole on each side of the cartridge with waterproof plastic tape. **7.** Leave floating cartridge in pool until product inside is thoroughly dissolved. Do not dispose of cartridge containing undissolved product. Doing so could result in product contamination leading to fire or explosion. Be aware that water coming out of cartridge containing product can bleach clothing or other surfaces. **8.** The cartridge will float on its side to signal the need for replacement. **Do not attempt to open or refill the cartridge.**

The amount of chlorine needed on a routine basis will vary with individual pool conditions such as bather load, water temperature, organic contaminants and other variables. Maintain a Free Available Chlorine (FAC) level of 1-4 ppm at all times. It may be necessary to increase the chlorinator feed rate or superchlorinate during heavy periods of use to maintain the desired FAC level. Maintain pH between 7.2-7.8 , Total Alkalinity between 80-120 ppm and Calcium Hardness at 200 ppm minimum. Test pool water regularly using a reliable test kit and make the necessary adjustments using the appropriate Leslie's pool care product. To remove excessive organic materials and to keep the water sparkling clear, superchlorinate weekly with **[an EPA registered sanitizer][brand name(s)]** when water temperatures are above 80°F. Follow use directions on those product labels. You may only need to superchlorinate every other week when water temperatures are below 80°F. Reentry into treated swimming pools is prohibited above levels of 4 ppm of chlorine due to risk of body injury.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal. **STORAGE:** Keep product dry in its tightly closed container when not in use. Store in a cool, dry, well [-]ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children **Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) empty container then offer for recycling, if available, or discard in trash.
