

U.S. ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (TS 762)
WASHINGTON, DC 20460

EPA REGISTRATION NO. 11411-6
TERM OF ISSUANCE

JUL 30 1994

NOTICE OF PESTICIDE: REGISTRATION
 REREGISTRATION
(Under the Federal Insecticide, Fungicide
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Leslie's Refillable
Chlorinator Cartridge

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Leslie's Poolmart
2022 Plummer St.
Chatsworth, CA 91311

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an endorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Revise the precautionary and practical treatment statements in your labeling in accordance with the enclosed Attachment A.
2. Delete the words "...Dry and related isocyanurates". This statement is too broad.
3. Under the Environmental Hazards statement revise the first statement to read: "This product is toxic to fish and aquatic organisms."

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Ruth G. Douglas
Product Manager 32
Antimicrobial Program Branch
Registration Division (7505C)

Enclosures

ISOCYANURATE RED ATTACHEMENT A

LABELING: (Statements are based on review of referenced acute toxicity data)

- 1. The signal word is "DANGER"
- 2. Revise the Precautionary Statements to read:

CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

- 3. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT.

IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN**

DANGER: Highly corrosive. Causes eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water if necessary.

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Keep product dry in tightly closed container when not in use. Store in a cool dry, well ventilated area away from heat or open flame. In case of decomposition isolate container if possible and flood with large amounts of water to dissolve all material before discarding. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label directions, contact your State Pesticide or environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. Do not reuse container. Triple rinse or equivalent. Then use for recycling or reconditioning, or puncture and dispose of in sanitary landfill or by methods approved by State and local authorities.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

NOT FOR USE IN VINYL-LINER POOLS OR HYPOCHLORINATORS

TO CONTROL BLACK ALGAE IN SWIMMING POOLS

DIRECTIONS

Where Algae Appears on Bottom of Pool: Adjust the pH of the pool water to 7.4 to 7.6. Turn off the filter/circulation system and wait until the water is calm enough to see a spot on the bottom. For best results, brush the black algae spots with a stiff bristle or wire brush prior to treatment. Pour approximately 1 oz. (1/8 cup) Leslie's Algi-Kill directly over the spot and allow it to settle to the bottom. Use enough Leslie's Algi-Kill to completely cover the algae spot. Allow Leslie's Algi-Kill to dissolve for a period of 45 to 60 minutes, then brush black algae away. It may be necessary to repeat treatment or allow more contact time.

Where Algae is Located on Pool Walls: Place 1 oz. (1/8 cup) Leslie's Algi-Kill in a cotton cloth, tie with string and suspend the bag into the water so that it touches the black algae spot. Allow Leslie's Algi-Kill to remain in place for 45 to 60 minutes, then remove and brush algae away. In extreme cases, it may be necessary to repeat treatment or allow longer contact time. For spot treatment on walls and bottom, use the prescribed dosage regardless of pool gallonage.

Where Pool is Infested With Black Algae: Adjust the pH to 7.4 to 7.6 and brush as explained above. Add at least one pound of Leslie's Algi-Kill per 4,000 gallons of pool water and broadcast it over the entire pool surface all at one time. Shut down pump for 24 hours. Follow this treatment with a thorough brushing. If a few traces of black algae remain, the above process should be repeated, or the treatment for spot black algae should be followed. In severe cases, where pool has been neglected for long periods of time, consult your local pool professional for advice.

THIS PRODUCT SHOULD NOT BE USED IN A PAINTED POOL, BLACK PLASTER POOL, OR FIBERGLASS POOL OR SPA. THIS CHEMICAL MAY ALSO BLEACH THE PLASTER IN THE AREA WHERE IT DISSOLVES, MAKING THAT AREA WHITER THAN THE SURROUNDING AREA, IF THE POOL IS STAINED.

DO NOT SWIM IN POOL DURING TREATMENT. SWIMMERS SHOULD NOT BE PERMITTED IN THE POOL AFTER LESLIE'S ALGI-KILL TREATMENT UNTIL THE CHLORINE RESIDUAL HAS REACHED THE 1.0 TO 2.0 PPM RANGE. USE A RELIABLE TEST KIT. THIS USUALLY TAKES 24 HOURS.
