WASHINGTON, DC 20460

OFFICE OF CHEMICAL SAFETY
AND POLLUTION PREVENTION

January 20, 2015

Mr. Mike Jennings
Director, Safety & Regulatory Affairs
Leslie's Poolmart, Inc.
2005 East Indian School Road
Phoenix, AZ 85016

Subject: Label Amendment – Minor Label Changes
Product Name: **Leslie's Swimming Pool Supplies Chlor Brite**
EPA Registration Number: **11411-15**
Application Date: November 6, 2014
Decision Number: 498776

Dear Mr. Jennings:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the

Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Killian Swift by phone at 703-308-6346, or via email at Swift.Killian@epa.gov.

Sincerely yours,

A handwritten signature in blue ink that reads "Demson Fuller". The signature is written in a cursive, flowing style.

Demson Fuller

FIRST AID	
If in Eyes	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes.• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.• Call a poison control center or doctor for treatment advice
If on Skin or Clothing	<ul style="list-style-type: none">• Take off contaminated clothing.• Rinse skin immediately with plenty of water for 15-20 minutes.• Call a poison control center or doctor for treatment advice.
If Inhaled	<ul style="list-style-type: none">• Move person to fresh air.• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.• Call a poison control center or doctor for further treatment advice.
If Swallowed	<ul style="list-style-type: none">• Call poison control center or doctor immediately for treatment advice.• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to do so by a poison control center or doctor.• Do not give anything by mouth to an unconscious person
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For medical emergencies, contact the Poison Control Center at 1-800-222-1222.	
NOTE TO PHYSICIAN	
Probable mucosal damage may contraindicate the use of gastric lavage.	

PRECAUTIONARY STATEMENTS

HAZARD[S] TO HUMANS AND DOMESTIC ANIMALS:

DANGER. Highly Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed. Irritating to nose and throat. Do not get in eyes, on skin or clothing. Wear protective eyewear (goggles or safety glasses). Wear protective clothing and rubber gloves when handling this product. Avoid breathing dust and fumes. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, smoking tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

{Environmental Hazard statement for end-use products in containers of less than 50 pounds (solid, dry weight)}

ENVIRONMENTAL HAZARD[S]: This pesticide is toxic to fish and aquatic organisms.

{Environmental Hazard statement for end-use products in containers equal to or greater than 50 pounds (solid, dry weight)}

ENVIRONMENTAL HAZARD[S]: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD[S]: Strong oxidizing agent. Do not mix with other chemicals. **Never add water to product.** Always add product to large quantities of water. Use only clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire or explosion. Avoid contact with flaming or burning material, such as a lighted cigarette. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area and flood with large amounts of water.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **[This product]{or}{brand name(s)}** is designed to dissolve quickly and completely providing a steady source of available chlorine to control growth of algae, kill bacteria and destroy organic contaminants.

SWIMMING POOLS

HOW TO USE: Broadcast **[this product]{or}{brand name(s)}** evenly over a wide area in the deepest part of the pool with the circulation pump running. To prevent bleaching or damage to the pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool.

ROUTINE USE: Broadcast 3 ounces of **[this product]{or}{brand name(s)}** per 10,000 gallons of pool water every other day, or as needed, to maintain a Free Available Chlorine (FAC) level of 1-4 ppm. This quantity may vary based upon bather load, water temperature and other conditions. Test the Free Available Chlorine (FAC) level with a reliable test kit. If starting up the pool, repeat the dosage until the Free Available Chlorine (FAC) level is 1-4 ppm. Maintain pH between 7.2-7.8 (ideal pH is 7.4-7.6), Total Alkalinity between 80-120 ppm depending on type of primary sanitizer used (80-100 ppm for sodium hypochlorite, calcium hypochlorite or lithium hypochlorite and 100-120 ppm for dichlor, trichlor or bromine tablets) and Calcium Hardness level between 200-400 ppm. To remove excessive organic materials and keep the water sparkling clear, superchlorinate {or} super chlorinate weekly with 11 ounces of **[this product]{or}{brand name(s)}** per 10,000 gallons of pool water. (This dosage provides approximately 6.8 ppm of Free Available Chlorine.) Follow "How to Use" instructions above. You may only need to superchlorinate {or} super chlorinate every other week if your water temperature is below 80°F. Do not reenter swimming pool until the Free Available Chlorine level is between 1-4 ppm.

SUPERCHLORINATION {OR} SUPER CHLORINATION: In case of algae, colored water, unpleasant odors, burning eyes, excess bather load, heavy rains and winds, or high temperatures, superchlorination {or} super chlorination may be required. Adjust the pH to 7.2-7.6 with the appropriate product. Follow the label directions. Add 21 ounces of **[this product]{or}[brand name(s)]** per 10,000 gallons of pool water to remove excessive organic materials and keep the water sparkling clear. (This dosage provides approximately 6.8 ppm of Free Available Chlorine.) Follow "HOW TO USE" instructions above. Do not reenter the swimming pool until the Free Available Chlorine (FAC) level is between 1-4 ppm. If algae are visible, brush pool surfaces and vacuum. Repeat treatment the following day, if necessary. You may only need to superchlorinate {or} super chlorinate every other week if your water temperature is below 80°F.

SPAS AND HOT TUBS: Each half ounce of **[this product]{or}[brand name(s)]** will provide approximately 4 ppm Free Available Chlorine (FAC) in 500 gallons of water. Using an appropriate test kit, test and adjust the water to the following values: pH 7.2-7.8 (ideal pH is 7.4-7.6), Total Alkalinity 80-120 ppm and Calcium Hardness 200 ppm minimum. Maintain these levels for proper spa and hot tub operation by frequent testing with a test kit. Do not allow the cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, etc. may cause foaming or cloudy water and may react with chlorine sanitizers reducing their effectiveness.

START-UP (FRESHLY FILLED): **1.** Turn on the circulation pump and ensure that it is operating properly. **2.** Add one ounce of **[this product]{or}[brand name(s)]** for each 500 gallons of water. Test the Free Available Chlorine (FAC) level and, if below 3-5 ppm, add additional **[brand name(s)]** until the FAC level reaches 3-5 ppm as determined by a reliable test kit.

ROUTINE USE: **1.** Turn on the circulation pump and ensure that it is operating properly. **2.** Broadcast a half-ounce of **[this product]{or}[brand name(s)]** (per 500 gallons) over the surface of the water. Test the Free Available Chlorine (FAC) level and add additional **[brand name(s)]**, if necessary, to attain a 3-5 FAC level. **3.** Maintain a 3-5 ppm FAC level while the spa or hot tub is in use. **4.** After each use, superchlorinate {or} super chlorinate with 1.5 ounces per 500 gallons of **[this product]{or}[brand name(s)]** to control odors and algae. Do not reenter spa or hot tub until the FAC is between 3-5 ppm as measured by a reliable test kit.

EXTENDED NON-USE PERIOD: During extended periods when the spa or hot tub is not being used, broadcast a half-ounce of **[this product]{or}[brand name(s)]** (per 500 gallons) over the surface of the water twice a week or as needed to maintain a 3-5 ppm FAC level.

{Storage and Disposal information may/may not be framed by border lines}

[All sizes except 1 Lb. pouch]

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Keep product dry in its original, tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children. **PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Triple rinse (or equivalent) empty container then offer for recycling, if available, or discard in trash.

[1 Lb. pouch only]

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Keep product dry in its original, unopened pouch until use. For partial pouch, fold top down and secure with adhesive tape. Store pouch in a cool, dry, well-ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children. **PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Non-refillable pouch. Do not reuse or refill this pouch. Triple rinse (or equivalent) empty pouch then offer for recycling, if available, or discard in trash.
