# - SPA - CHLOR BRITE III

UN 2465

## CONCENTRATED POOL CHLORINATING GRANULAR

- For Use In Spas And Hot Tubs
- Stabilized For Extended Chlorine Life

Active Ingredient:

Sodium Dichloro-s-triazinetrione, Dihydrate . . . 99%

Inert Ingredients . . . . . 1%

Total . . . . . 100%

(Available Chlorine — 55%)

**Keep Out of Reach of Children  
DANGER**

### STATEMENT OF PRACTICAL TREATMENT (FIRST AID)

**IF SWALLOWED:** Drink large amounts of water. DO NOT induce vomiting. Contact a physician or poison control center immediately. **NOTE TO PHYSICIAN:** Probable mucosa damage may contraindicate the use of gastric lavage. **IF ON SKIN:** Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. **IF IN EYES:** Flush with cold water for at least 15 minutes. Call a physician immediately. **IF INHALED:** Remove person to fresh air. Call a physician immediately.

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. Wear goggles or face shield and use rubber gloves and only thoroughly clean, dry utensils when handling. Irritating to nose and throat. Avoid breathing dust and fumes. Remove and wash contaminated clothing before reuse.

**CHEMICAL HAZARDS: DANGER:** Strong oxidizing agent. Use only clean dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including other pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire or explosion. Avoid any contact with flaming or burning material, such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any inorganic or unstabilized chlorinating compounds. (e.g. calcium hypochlorite). Such use may cause fire or explosion.

**ENVIRONMENTAL HAZARD:** This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of wastes.

**STORAGE AND DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Securely wrap container in several layers of newspaper and discard in trash.

**EMERGENCY HANDLING:** In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area.

**Directions for Spa and Hot Tub Use:** It is a violation of federal law to use this product in a manner inconsistent with its labeling. Each half ounce of product will provide approximately 4 ppm available chlorine in 500 gallons of water.

Using an appropriate test kit, test and adjust the water to the following values: pH 7.2-7.8 total alkalinity 80-120 ppm, calcium hardness 200 ppm minimum. Maintain these conditions for proper spa and hot tub operation by frequent testing with a test kit. Do not allow cyanuric acid level to exceed 150 ppm. It is recommended that spas and hot tubs be drained every 30-90 days, more often under heavy use. Consult manufacturer's recommendations concerning the compatibility of chlorine sanitizers with their equipment. Some oils, lotions, fragrances, cleaners, etc. may cause foaming or cloudy water and may react with chlorine sanitizers to reduce their efficacy.

**Start-Up (Freshly Filled):** 1. Turn on the circulation system and ensure that it is operating properly. 2. Add one ounce of this product for each 500 gallons of water. Check the free available chlorine (FAC) and, if below 4-5 ppm, repeat as needed.

**Regular Use:** 1. Turn on the circulation system and ensure that it is operating properly. 2. Scatter a half ounce of this product (per 500 gallons) over the surface of the water. Test for FAC and add additional product, if necessary, to attain 4-5 ppm FAC. 3. Maintain 1-3 ppm FAC while the spa or hot tub is in use. 4. After each use, shock treat with 1.5 ounces per 500 gallons of this product to control odors and algae. Repeat as needed. Heavy use of treated swimming pool/spas is prohibited above levels of 3 ppm of chlorine.

**Extended Non-Use Period:** During extended periods when the spa or hot tub is not being used, add 1.5 ounces of this product per 500 gallons twice a week with the circulation system running or as needed to maintain 1-3 ppm free available chlorine.
